

# HARDING MOVES TO USE ARMED FORCE TO BACK WARNING PROCLAMATION TO STRIKING RAIL MEN

## New Move Planned In Battle For DuPre's Life

### LAWYERS TO ASK FOR MODIFICATION OF COURT ORDER

Attorney Allen Holds That Four of Six Supreme Court Justices Decided for a Second Trial.

### PREPARING TO FILE NEW MOTION FRIDAY

Supreme Court Quotes DuPre's Letter to The Constitution, Terming It "Insolent Bravado."

The fight for the life of Frank B. DuPre under death sentence for the daring robbery and murder at Kaiser's jewelry store last December, has not been finished.

Attorney H. A. Allen, representing DuPre, announced Thursday, after studying the decision of the supreme court which denied the "gray overcoat bandit" a new trial, that he will immediately file a motion with the supreme court seeking a modification of the decision on the ground that four of the six supreme court justices held that the condemned youth was entitled to another trial.

In the decision of the supreme court, rendered Thursday, Judges Fish, Beck and Atkinson sustained the contention of the defense that DuPre should have another trial on the ground that certain counter-officials introduced by Solicitor Boykin at the new trial hearing had not been made a part of the record.

Agree With Defense. Judges Fish, Atkinson and Hines agreed with the defense that the trial judge erred in instructing the jury as to what method they should use in determining what penalty they should fix.

It is now contended by Attorney Allen that of the six supreme court justices, Judges Fish, Atkinson, Hines and Beck ruled in favor of DuPre. On that ground he will file a motion to modify the decision so as to grant the new trial.

Attorney Allen was at his office late Thursday preparing the motion. He indicated he will file it sometime Friday.

DuPre was originally sentenced to hang on March 10, following his conviction for holding up and robbing the Nat Kaiser jewelry establishment on Peachtree street, and shooting to death Irlby C. Walker, Pinkerton detective, and seriously wounding B. Graham West, city comptroller.

The case attracted nationwide attention. He admitted the shooting and blamed it on his infatuation for Betty Andrews, young woman from Gainesville. She is now at her home in Gainesville on probation.

She pleaded guilty to the state farm, but was sentenced to the state farm on condition that she stays in her home city for the period of the sentence and behaves herself.

Caught in Detroit. DuPre was at large for several weeks after the killing, and was finally apprehended in Detroit. The chase led detectives through many large cities, and clue after clue was followed before he was finally arrested by Detroit police.

After holding a jewelry salesman at bay with a pistol and securing a large diamond from the Kaiser store DuPre made a break for the door. The Pinkerton man stepped in his way, and was shot to death. DuPre ran rapidly through the Kimball house arcade to the hotel lobby, where he encountered a group of prominent men, including B. Graham West. The city comptroller attempted to halt him and was shot through the face. He recovered, after lingering in a critical condition for weeks.

DuPre's trial was held before Judge H. A. Mathews, of Macon, who was presiding in the Fulton criminal court at the time. A subsequent motion for a new trial filed by Attorney Allen was denied and the appeal to the supreme court was made.

Gilbert Writes Decision. Justice Price Gilbert wrote the supreme court decision. It consumed approximately 70 typewritten pages. "We are reminded," the opinion stated, "that human life is involved. It is true that the life of the accused is immediately and vitally affected. But this must not and cannot obscure the further fact that the lives of millions of people and law abiding citizens engaged in the efforts to earn an honest living for themselves and

### DuPre Prefers Electric Chair To the Gallows

BY PARKS RUSK.

Frank DuPre had rather come to his death from the high voltage current of an electric chair than to have his neck broken on the gallows.

The "gray overcoat bandit" made known his preference Thursday afternoon to this writer. He expressed his choice between the two in the calm manner of a man choosing between two cravats in a haberdashery.

There now pends in the state legislature a measure introduced by Representative Perkins, of Muscogee county, which would replace the present gallows in each county with a modern electric chair at the state farm. It has passed the house, and now awaits action by the senate.

Doubtful, However. It is doubted if the bill is passed and placed into effect in time for DuPre to meet his death in the way of his choice, in the event he fails to get a new trial.

DuPre gave no indication of emotion when told Thursday that the highest court in the commonwealth had ruled against him. He indicated he held but little hope for a new trial. He is resigned to death, he said, and does not fear to meet his God. It is his desire that his plight prove a lesson to other youths.

"Next month—on the sixteenth—I will be 39 years old," he said, "and I would consider that my life had been worth at least something if it were possible for me to talk to every young man or boy in Atlanta—or in the world for that matter, for I really believe I could give everyone of them some valuable advice—advice which I am probably in better position to give than anyone else, just for the simple reason that I now see clearly the fatal mistakes I have made."

"There is a successful and wonderful future for any boy who is given the right kind of advice in his early years. However, the boy himself must at the same time try to help himself by living a good, clean life and heeding the advice of his parents and older people."

"My advice to boys is to attend church and Sunday school regularly, and disregard pool rooms, street corners and cheap hotels. Don't walk a block out of the way to avoid meeting a teacher of Christ. Come face to face with him or her, grasp their hands and ask their advice and prayers. I pray nightly and read my testament."

That is the way Frank DuPre talked Thursday as he was nearer execution than he has ever been. The cell was darkened, but the window afforded enough light to show that he had pride in his appearance. His collar and tie was neatly arranged and his hair polished straight back from the forehead after the fashion of Valentino, and it was all in very striking contrast to the occupants of adjacent cells, who lounged, bewiskered and shirtless on the floor.

"By the way," he reporter said, "what ever became of the gray overcoat?"

"I gave it to my brother about two weeks after I was arrested and brought to Atlanta. That was a good coat, too."

### ST. JOHN SHORTAGE CLOSED INCIDENT

Council Approves \$1,077 Check Covering Alleged Discrepancies—Approve Bridge Appropriation.

Approving the recent audit of records of the city water works, which disclosed a shortage of \$1,077 in the accounts of W. G. St. John, former secretary, and accepting a certified check for the amount, the finance committee of city council Thursday, instructed the city attorney to give St. John a receipt in full for all shortages and close the incident so far as the city is concerned.

St. John was dismissed by the water board, following discovery, by an accounting firm engaged in auditing the city's books, of alleged discrepancies of \$150 in his accounts. Subsequently other alleged shortages were uncovered, bringing the total to \$1,077. This amount was covered by the certified check presented by the former secretary with members of the finance committee expressing themselves as satisfied with the arrangement.

The finance committee approved an appropriation of \$2,800 for the erection of a concrete bridge on East North avenue, at Moreland avenue. The proposed bridge will expedite traffic facilities on this thoroughfare which

### STATE SANITARIUM OFFICERS GRILLED BY LEGISLATORS

Sharp Inquiry Made Into Manner in Which Institution Is Conducted at Meeting of House Committee.

### DR. N. H. JONES TELLS OF EXCHANGE SYSTEM

Representative Williams Announces He Will Fight Appropriation Until All Insane Persons Are Cared For.

Sharp inquiry into the manner in which the affairs of the state sanitarium at Milledgeville are being conducted was made Thursday afternoon by the members of the house ways and means committee at its session held in the office of General William A. Wright, state comptroller, and officers of the sanitarium were closely questioned relative to charges that the sanitarium officials have refused to accept insane persons in some cases and have returned others to the counties from whence they were sent to the asylum.

Representative Williams, of Walton, during the course of the inquiry, announced that he would fight on the floor of the house any appropriation for the sanitarium to be introduced in the future until all insane persons now confined in county jails are turned over to the state sanitarium and are properly received at that institution. The committee agreed to recommend a deficiency appropriation of \$150,000 to cover expenditures made during the year beyond the regular appropriation.

Capacity Is Limited. In explaining the return of harmless patients to their respective counties to be taken care of by the counties, Dr. N. H. Jones, superintendent of the sanitarium, stated that Governor Thomas W. Hardwick issued instructions last year that an exchange system of prisoners be adopted. He said this was recommended because the sanitarium was unable to take care of all patients sent to it every year.

Dr. Jones said Governor Hardwick instructed the authorities to send harmless patients back to their counties and receive in their place the more violent patients who must be kept under restraint. He gave the committee information concerning the number of patients, the number of employees and expenses of administration. Dr. Jones said the average number of patients last year was 4,097 and said this had dropped this year as a result of the exchange system to about 3,900.

Representatives Carwell, of Wilkinson, and Quincy, of Coffee, expressed the opinion that the annual reports of the sanitarium should be more explicit in showing how the money received at the sanitarium is being disbursed. The committee took no action on a bill introduced by Representative Ennis, of Baldwin, appropriating \$20,000 to remodel an ice plant at the sanitarium. The committee will meet again next Tuesday afternoon.

New Dormitory Voted. In the house Thursday nearly the entire session was given over to the debate over an appropriation of \$65,000 for a new dormitory at the South Georgia Normal school at Valdosta. The measure finally was passed by a vote of 110 to 66. Representative McMichael, of Marion, announced he would postpone the renewal of his fight against the state highway department until Friday morning.

The senate adopted a resolution Thursday calling on all state departments to furnish the legislature with a complete list of their employees and the salaries paid them. Another feature of the senate session was the renewal of the capitol removal fight. A resolution, was introduced in both the house and senate providing for the imposition of a luxury tax in Georgia, including a tax on motor, picture admissions, soft drinks and amusements.

With the introduction of a bill providing for the creation of a board of censors for motion pictures and regulating the motion picture industry, Thursday, there are now two measures before the house covering this subject. The bill introduced Thursday was prepared by Representative Collins, of Cherokee. The bill reported favorably last year by the special judiciary committee was framed by Representative

### Many Are Offered Throne of Albania; No Acceptances Yet

Tirana, Albania, July 13.—(By the Associated Press.)—Since Jerome Napoleon Bonaparte, the American great-nephew of Napoleon I, declined the Albanian throne last December, the Albanian government has been casting about for a suitable king or regent.

Offers have been made to Prince Cyrille of Bulgaria, King Ferdinand and the Duke of Abruzzi, cousin of King Victor Emmanuel of Italy, but they are reported to have shown no disposition to accept.

### HARRIS ATTACKS NEW YORK SOLO ON LYNCH STAND

Calder Stirs Up Fight Attempting to Place in Congressional Record Story of Georgia Case.

### OUTRAGE AT HERRIN BROUGHT IN DEBATE

Governors and People of South Deplore Lynchings, Chamber Is Told by Southern Senators.

Constitution Bureau, Raleigh Hotel.

Washington, July 13.—(By the Associated Press.)—Reading into the record a newspaper attack on the state of Georgia for recent lynchings in Wayne county, Senator Calder, of New York, provoked a spirited debate in the senate today in which several southern senators participated, including Senator Harris, of Georgia.

The Georgia senator charged Senator Calder with attempting to exaggerate the true conditions by inserting the story in the record, declaring that more lawlessness could be found in the city of New York in a week than in the state of Georgia in a year.

Referring to the Wayne county incident, the newspaper story said Governor Thomas W. Hardwick had offered a large reward for the lynchers and was determined to break up lynching in the state. Senator Harris took offense to the act of Senator Calder, in inserting it in the record, while both he and Senator Watson, of Georgia, were absent from the chamber.

Sees Sectional Issue. He declared that "every Georgia governor, even the present one, had deprecated lynching" and that from the record in his state, the New York senator should not raise a sectional issue.

Sensor Harris then proceeded to read from a New York newspaper of current date, and recited a few of the crimes listed for the past 24 hours. "The senator from New York speaks of lawlessness in Georgia and refers to lynching, but it is dangerous to walk abroad in daylight in the senator's city," Senator Harris said.

The Georgia member then declared that the south should be left alone to settle its negro question, adding that outside interference would not help. "The good people of the south and Georgia deplore lynchings just as the good people of other states deplore them," he said. "Many negroes have gone north and received treatment different from what they expected. Some of them have returned and said they suffered more in the north than in the south and have been glad to come back home where they are well treated."

Anxious to Return. Those who went north were disappointed and were anxious to return, as a rule, the Georgia senator said. Senator Harris declared that it was the duty of every citizen of the United States to abandon sectional references, and that as long as he was in the senate he could never raise a sectional issue which would tend to arraign north against south or east against west.

Senator Shields, Tennessee, interrupted to say that Senator Calder had not mentioned lawlessness in the north. "He did not say anything about the recent terrible massacre of miners at Herrin, Ill., almost in the shadow of the city hall of Chicago," exclaimed Senator Shields. "We do not know how many were killed; it runs anywhere from 25 to 40, according to accounts, but we do know that sixteen

### FIRST G. O. P. SPLIT ON TARIFF COMES ON COTTON DUTIES

Ten Committee Amendments, Proposing Increased Duties on Yarns, Rejected in Senate.

### MEMBERS OF "BLOC" JOIN OPPOSITION

Democrats Vote Solidly, With One Exception, Against Proposed Raises in Rates on Cloths.

BY THE ASSOCIATED PRESS.

Washington, July 12.—The first real split in republican senate ranks over the administration tariff bill, came today during consideration of the cotton schedule with a result that ten committee amendments proposing increased rates on various kinds of yarns and on silver and roving were rejected as fast as they were reached. The majority opposition was led by Senator Lenroot, of Wisconsin, and reached its maximum strength on the first roll call, twelve republicans opposing the committee rate on a roll call by which the amendment was rejected, 32 to 24.

The twelve republicans were Borah, Capper, Cummins, Jones of Washington; Lenroot, McCormick, Nelson, New, Norbeck, Sterling, Townsend and Willis. The lowest republican vote against any of the amendments was nine with the average running at ten. With a single exception on each roll call, the democrats voted solidly against the proposed increases.

With the basic duties on yarns reduced, it was predicted that cuts in the rates on at least the lower grade cotton cloth of even greater proportions than recommended yesterday by the finance committee majority would be made as the senate proceeded with the schedule. That probably will be sometime next week, as the schedule is to be laid aside tomorrow in favor of the dye embargo provision of the bill, which, under announced plans, will be held before the senate until settled. A vigorous fight over it is forecast.

Members Join Opposition. Several members of the republican agricultural tariff bloc joined today in the opposition to the committee increases in the cotton rate, but a majority of the bloc, which was instrumental in obtaining duties for farm products approved by the senate during the past two weeks, voted to sustain the committee.

Opening the fight against the committee rates, Senator Lenroot argued

### Even Iron Bars Can't Stop 'Em In Floyd County

### Two Stills in Operation and Beer Mash Captured in Rome Jail

Rome, Ga., July 13.—(Special.)—Two stills in full operation and ten gallons of beer mash were captured tonight when the keen sense of smell of Jailer Paul Freeman led him to the prisoners' ward on the first floor of the Floyd county jail.

The jailer was enjoying his after-supper pipe. The moon shone dimly from behind dark gray clouds. Only the singing of a few prisoners broke through the silence of the jail. A good time, thought Freeman, to read the newspaper. He arose and started toward the table. Suddenly a gentle draft of wind wafted a familiar odor to his nose.

He followed the trail. In a big water sink within the large cellroom, he found ten gallons of beer mash. On the floor were two coffee pot stills humming away at their task of making corn whiskey.

Corn bread furnished the inmates as prison food had been ground by hand. Syrup and sugar also had been smuggled into the jail—something which Jailer Freeman does not understand, he stated, because he examined everything given the prisoners by visitors. The discovery caused a sensation throughout the city. No arrests have been made. But the sheriff is reported worried about the jail being turned into a distillery.

### These Life-Savers Didn't Want Mermaids Doing Their Trick

Ocean City, N. J., July 13.—Learning that a bevy of mermaids, headed by Ethelda Bleibrey and Ada Taylor, champion swimmers, had volunteered to go into the life saving business here "in the interest of humanity" male beach guards have called off their strike for more pay. Twenty-four men were back on the job today, drawing \$15 a week, minus a deduction of \$2.50 a week until their \$20 uniforms are paid for.

### SLIGHT IS FELT BY LODGE; UNABLE TO SEE HARDING

Massachusetts Senator Disgruntled Over Being Told to Return to White House Later.

### PENDING MEASURES ARE GIVEN SETBACK

President Out Playing Golf, G. O. P. Leader Informed When He Calls for Important Conference

Constitution Bureau, Raleigh Hotel.

Washington, July 13.—(By Constitution Bureau Wire.)—Plans of republican leaders of the senate to confer with the president over an agreement to postpone consideration of pending legislation, including the ship subsidy and bonus bills, met with a temporary setback today.

Senator Lodge, the republican leader, is understood to have had a tentative engagement at the white house this morning, when he was to arrange for a conference between the president and the senatorial committee, composed of Senators Watson, Curtis and himself, over the agreement reached at the Lodge dinner recently, relative to the legislative program. The conference has been withheld heretofore due to the chief executive's time being consumed with the strike situation.

Returning to the capitol, Senator Lodge was described as "frothing at the mouth" over his inability to see the president. At the white house the Massachusetts senator was informed that President Harding was out playing golf and that he would not be able to see the president. He was requested to return Friday.

### Gives Vent to Feelings

The idea of the republican leader of the senate being disregarded by even the president of the United States is said not to have been taken very well by the Massachusetts senator, who strongly gave vent to his feelings, according to newspaper men interviewing him immediately afterwards.

Whether or not Senator Lodge was expected by the president is not known. At any rate, the senate leader was of the opinion that he had a tentative agreement with Mr. Harding, and to be told that the president was enjoying a game of golf when his presence was being sought for conference over important matters did not sit well with Senator Lodge.

First information was that the Massachusetts senator would not return to the white house Friday, as requested, being peeved over his neglect. However, it was announced later in the day that the president would see him Friday morning at 9 o'clock.

### Culmination of Events

Back of Senator Lodge's anger, as expressed to newspaper men, are said to lie a number of other factors, today's incident merely being a culmination of events. The Massachusetts senator is confronted with a heated campaign for re-election in his home state this year. Democrats and his republican enemies in the state are making a determined effort to defeat him. The charges being made against him are that the senate under his leadership has deteriorated and that the administration has been without outstanding leadership. This latter charge, while bearing directly on President Harding, is also reflected to Mr. Lodge's role in the senate.

The Massachusetts senator is said to feel that responsibility for the legislative jam in congress rests almost solely upon President Harding's uncommanding policy. If the president would take the reins of congress in hand and dictate or request the policy

### \$25,000,000 BOND ISSUE FOR STATE ROADS IS FAVORED

Plan Submitted by Representative Perryman Wins Approval of Joint Committees of House and Senate.

### MANN PRESENTS PLAN FOR \$40,000,000 ISSUE

Authors of Two Measures Are Directed to Get Together and to Make Effort to Harmonize Bills.

A plan calling for a good road bond issue of \$25,000,000, submitted by Representative Jones Perryman, of Talbot, was favored by a majority vote at a joint meeting of the senate and house committees on public roads Thursday afternoon.

The committee, which met to agree on a bill to report back to the respective branches of the assembly, was also presented with a plan by Representative Mann, of Glenn, which would require an issue of approximately \$40,000,000. This plan won considerable support. Authors of both proposals were authorized to incorporate them into bills and submit them at another joint session, with the understanding that if they did not harmonize to suit the whole committee, all members favoring the Perryman plan would sign his bill as joint authors, and those preferring the Mann bill sign it as joint authors, and both bills would be introduced in the senate and house respectively.

### Harmony Is Expected.

It was believed by several in attendance, however, that the two representatives would harmonize their measures, so that only one bill would be introduced. Mr. Perryman's plan called for a "usable" system of highways in every county in Georgia, though not necessarily a "completed" system. The maintenance saving, together with the motor vehicle license fees, would provide sufficient funds for retirement of the bonds, he estimated.

Mr. Mann's plan provided for a certain mileage of paved road and a certain mileage of top soil road. Both members discussed their measure at length.

In offering his solution Mr. Perryman stated that he favored the building of a usable system of highways, so that the small counties would be put on the same basis as the larger counties; that by grading, draining, top-soiling and properly bridging streams on the whole system, the

### TICK ERADICATION REPEAL FAVORED

Delegations From Many Counties in South Georgia Appear Before Committee of the House.

At the end of a hearing which lasted three hours Thursday night, agriculture committee No. 1 of the house, in session at the Kimball house, reported favorably a bill introduced by Representative Vay, of Taylor, to repeal the tick eradication law in Georgia.

As reported out of the committee the bill would permit the shipment or movement of tick infested cattle into, within or through the state, and the dipping of cattle as a state wide eradication measure would be rendered valueless. Members voting for the repeal freely expressed the opinion that it would meet defeat in the house.

Delegations protesting against the present law and urging its repeal or modification appeared before the committee from Echols, Taylor, Ware, Bryan, Camden and other south Georgia counties, in some of which dipping vats have been dynamited. They argued that enforcement of the existing tick eradication measure is virtually amounting to a confiscation of their cattle and the cattle owners are unable to continue under the hardship.

Dr. P. F. Bahsen, state veterinarian, said that the tick eradication law is a hindrance to the cattle industry.

### TROOPS ORDERED HELD IN READINESS TO GUARD SHOPS

First Act Toward Use of Soldiers in Rail Strike Comes in Situation at San Antonio, Texas.

### LINE INVOLVED NOW IN RECEIVER'S HANDS

Action Does Not Indicate Federal Troops Will Be Used Generally—State Forces to Be Employed.

BY THE ASSOCIATED PRESS.

Washington, July 13.—President Harding took the first step today toward backing up with the military arms of the government his proclamation warning striking railway shopmen against interference with the transportation of interstate commerce and the mails.

Instructions were sent at the direction of the president to Major General John L. Hines, at San Antonio, Texas, to prepare a sufficient force of troops to give adequate protection to the lines of the Missouri, Kansas and Texas railroad which have been attacked by striking shopmen, particularly at Denison, Texas.

Coincident with these instructions there went forth from the war department to C. E. Schaff, of St. Louis, the receiver appointed by a United States court for the Missouri, Kansas and Texas, the advice that he again called on the governor of Texas for protection for the railroad property, he having reported that previous appeals to the state executive had been unheeded. The receiver further was promised that should his appeal bring no protection from the state authorities, "the federal government is ready to afford protection and will take action, if necessary, as soon as you have reply from the governor."

Expect Delay in reply. Secretary Weeks, who carried out the president's instruction, after a conference at the white house, at which he and Mr. Harding went over an appeal from the receiver for federal protection, had tonight received no reply from Mr. Schaff and because of the necessity of communicating with Governor Neff, of Texas, it was regarded probable that Mr. Schaff would be unable to advise the government before some time late tomorrow.

Officials in announcing the government's action, emphasized it was taken because the Missouri, Kansas and Texas was in the hands of a receiver appointed by a federal court and consequently was under the supervision of the federal government. No official statement was available to indicate that the action was to be taken as a precedent determining the policy to be followed by the government in other cases where violence and lawlessness arising from the strike interfered with the two essentials as enumerated by President Harding in his proclamation—movement of the mails and maintenance of interstate commerce. It is understood, however, that the president personally will pass on other emergencies that may arise calling for the use of troops where the question of federal receivership is not involved.

Although the action in the case of the M. K. & T. railroad was the big step in the rail strike situation here, there were other developments in the capital in connection with the strike during the day.

Gets Message from Jewell. President Harding received a telegram from B. M. Jewell, head of the railway employees' department of the

C. F. von HERRMANN, Meteorologist, Weather Bureau.

American Federation of Labor, and heads of the six striking shop crafts replying to his proclamation and setting forth the viewpoint of the striking workers. So far as could be learned at the white house tonight, the president had not determined whether the telegram called for a reply.

The proclamation of the president, to which the employees' telegram took exception as based on "incomplete information," was commended by the board of directors of the chamber of commerce of the United States in a resolution which called on business organizations of the country to assume leadership in crystallizing public sentiment in upholding the president.

The attempt of the striking railroad employees to enforce their own views through methods of industrial warfare, the resolution added, "Should meet the condemnation of all who believe in orderly process of settlement."

The president also received during the day a letter from Postmaster-General Work stating that a survey just completed showed that 50,000 motor vehicles could be made ready on 24 hours' notice to carry the mails in the event the railroads found it impossible to do so. Supplementing this, the Aeronautic Chamber of Commerce of America with headquarters in New York, notified Dr. Work that it was prepared to mobilize an aerial mail fleet of commercial airplanes.

**FOUR COMPANIES LEAVE FOR RAILROAD SHOPS.**  
St. Louis, July 13.—Four companies of the 138th infantry Missouri

national guard, late today departed for Poplar Bluff, where requests have been made for troops in case of eventualities in connection with the shopmen's strike.

**400,000 BIG FOUR MEN NOW VOTING.**  
Cincinnati, Ohio, July 13.—Clerks, station employees and freight handlers on the Big Four railroad system numbering, it is said, approximately 400,000 are taking a strike ballot, it was referred today unofficially at headquarters of the clerks' union here. Officials of the union refused to comment on the reported walkout saying that the matter was in the hands of the general chairman.

**STRIKE TO END WHEN JUSTICE HAS BEEN SECURED.**  
BY THE ASSOCIATED PRESS  
Chicago, July 13.—The railway shopmen's strike will not be called off and the men will not be ordered back to work "until justice has been secured," E. M. Jewell, head of the railway employees department of the American Federation of Labor, said tonight in a statement replying to the rail executives ultimatum of yesterday.

The rail executives suggested that the strike be called off and the men return to work, after which differences might be taken up before the railroad labor board.

Mr. Jewell, in tonight's statement, intimated that the reason the executives refused to meet shopmen's officials in an effort to mediate the strike as had been suggested, was that the railroads wanted to destroy the employees' organizations.

"If such is the case," the statement said, "the railroads are due to receive a sudden awakening, the American public should charge them with the responsibility."

**New Plan Intimated.**  
At the labor board it was announced that an effort might be made along new lines to settle the strike, but no details were given. After rail executives had refused to meet shopmen's representatives yesterday, board members announced that the executives who refused to confer did not speak for the individual railroads and intimated that a new plan of settlement might be based on this fact. It had been suggested in railroad circles today that the railroads of the northwest were apparently anxious to settle and that new peace plans might be directed at this section.

The shopmen's representatives replied today to President Harding's proclamation which declared that the strike must be settled through the authorized agencies, by placing the blame for the strike on the railroads and asserting that carriers had violated many decisions of the labor board. Other events during the day included orders from the war department to have troops in readiness to protect the Missouri, Kansas and Texas lines, in the hands of a receiver appointed by the United States court, announcement by Postmaster General Work that 50,000 motor vehicles could be used to transport the mails, if rail service fails and the issuing of restraining orders to the St. Louis-San Francisco railway at Fort Smith, Ark., and the Chicago and Eastern Illinois and Toledo, St. Louis and Western railroads at East St. Louis.

**LEADER LAUDS WILSON.**  
IS WILDLIFE CEESED.  
Macon, Ga., July 13.—(Special).—C. T. Nicholson, member of the executive board of the international association of machinists, and who is in charge of the strike of shopmen in southeastern territory, was wildly cheered this afternoon at the Grand theater when he remarked, "Former President Woodrow Wilson has done more for the American workman than any other person." Wives of striking shopmen and their friends from different walks of life, clerical and business men, were in the audience that filled the theater to its capacity.

It was the regularly held meeting of the shopmen, usually held in the morning, with some added attractions. The extra attractions were the address by Mr. Nicholson, a talk by Mrs. C. C. Harrell, alderman, in which she expressed hope for an early settlement of the strike on a basis that would be satisfactory to all parties concerned, and some musical features. Chairmen in charge of the strikes on different railroads here made their remarks. Mr. Nicholson, who spoke in Atlanta this morning and who left for Jacksonville tonight, jumped into his address by declaring that "organization is your greatest weapon in this struggle." He referred to the world war and to the part that labor played in the war. In lauding Wilson he referred to the passage of the Adamson eight-hour law, as promised, although railroads had declared it impracticable.

"Woodrow Wilson asked you to return a democratic congress," said the speaker, "but you wanted a change. You got it. President Harding promised you nothing, he owes you nothing and he will give you nothing."

The speaker referred to the passage of the Esch-Cummings bill and the creation of the labor bill. The Esch-Cummings bill he declared, legalized theft.

**Lively Bout Looming In War for Legislature; Four Candidates Entered**

Waycross, Ga., July 13.—(Special). A lively race for the two War counties seats in the next legislature is looming with four candidates qualified and the possibility of another being within the next 24 hours.

According to Secretary L. J. Smith, of the War county executive committee, the following candidates have qualified: J. D. Rialock, present representative; W. W. Griffith, of Millwood; Harry Joiner, of the local A. C. L. Shop federation, and Calvin W. Parker, former representative.

**DEMOCRATS TO HOLD MEETING ON FRIDAY**

Secretary M. D. Collins of the fifth district congressional democratic committee, announced Thursday that a meeting of the members of this committee will be held Friday morning at 10 o'clock, in the office of McElreath & Scott, 807 Silver building.

**SURVEY WILL BE MADE OF PENSACOLA WATER**

The city commissioners of Pensacola, Fla., have obtained the services of P. H. Norcross, of Atlanta, who is an expert in city water plant construction, to make a survey of the city's water system, with a view of finding out what becomes of millions of gallons of water for which there seems to be absolutely no accounting.

**Asks \$15,000 Damages.**

Mrs. A. E. Gillespie Thursday filed suit in the city court of Atlanta for \$15,000 against the Joy Floral company and Roy J. Regan, one of their employees, for injuries received when one of the Joy company's trucks, it is charged, backed into her, before the entrance to the Arcade on Broad street, the night of May 29, 1922. Harwell, Fairman & Barrett, attorneys, filed suit for Mrs. Gillespie.

**Will Probated.**

Athens, Ga., July 13.—(Special).—Advises received in Athens today from New York city with reference to the appraisal of the property of Mrs. Adelaide Peckles, of Athens, who died recently from injuries sustained in an automobile-street car smash in Atlanta, stated that her fortune, estimated at about \$80,000, has been divided between Arnie S. Crawford, sister, and Ellen Crawford, niece, of Athens, mother and daughter respectively. Her jewelry, home and personal effects have also been left to her Athens relatives.

**Seven-piece orchestra—John Slaughter added—playing Warm Springs this week-end.**

The Japanese government is planning to amalgamate all electric enterprises to stabilize the industry and save money in developing water power.

**Seven-piece orchestra—John Slaughter added—playing Warm Springs this week-end.**

**Seven-piece orchestra—John Slaughter added—playing Warm Springs this week-end.**

**Seven-piece orchestra—John Slaughter added—playing Warm Springs this week-end.**

**Seven-piece orchestra—John Slaughter added—playing Warm Springs this week-end.**

## Yesterday in the Assembly

### HOUSE

#### Bills Introduced

By Green, of Jones—To regulate trials in criminal cases providing for release of prisoners who have been confined three months without being tried.

By Green, of Jones—To make it unlawful for an officer to make an arrest without proper warrant.

By Mason, of Hart—To empower counties to establish free libraries.

By Richmond delegation—To appropriate \$33,700 for the Georgia School for Mental Defectives at Greenwood.

By Sumter delegation—To appropriate \$38,153 to the third district Agricultural school.

By Riley and Hines, of Sumter—To protect fur-bearing animals.

By agricultural committees Nos. 1 and 2—To provide constitutional amendment for purpose of constructing state-owned terminals at Savannah.

By Strickland, of Brantley (by request)—To provide for establishment of juvenile courts.

By Atkinson, of Chatham—To regulate practice of professional engineering.

By Voelle, of Camden—To provide for return of intangible property for taxation and providing a stamp tax for same.

By Guess, of DeKalb—To amend workmen's compensation law changing

### SENATE

#### Bills Introduced

By Thorpe, of the 2nd, and Cone, of the 40th—To amend section 4208 of the code providing for execution of deeds outside the state of Georgia, and for other purposes.

By Pope, of the 44th—To fix bonds of employment agencies at \$1000, instead of \$500, and to provide that employment agencies shall not charge applicant more than a two per cent commission for placement and nothing if the applicant is not placed.

By Bellah, of the 42nd, and Pope, of the 44th—To amend section 606 of the code of 1910 relative to road tax in cities of certain population.

By Garpley, of the 36th, and Campbell, of the 34th—To provide for an additional judge for the Stone Mountain circuit.

rates of compensation in certain classes.

By Johnson, of Chattanooga—To authorize consolidation of offices of clerk and ordinary in counties of less than 10,000 population.

By Woodward, of Cook, and others—To provide for experimental work of coastal plain experiment station in fight against wilt and other melon diseases.

By Bentley, of Fulton—To provide tax on lubricating oils and motor oils.

By Collins, of Cherokee—To provide for the people at this time, form the proper foundation for completed permanent road surface as traffic condition in each community may later prove to be necessary.

Many of the counties, in fact, a large majority of them, except perhaps, in the immediate neighborhood of the larger towns or cities, can be perfectly well served for many years to come by properly located highways with substantial permanent bridges and graded and top-surfaced or gravelled surface of so-called "top soil," "sand clay," "gravel," "water bound macadam" or other similar material which would not cost an average more than from \$8,000 to \$10,000 per mile, which would, while adequately serving the people at this time, form the proper foundation for completed permanent road surface as traffic condition in each community may later prove to be necessary.

It must be borne in mind, however, that the federal aid law requires a certain percentage of federal funds must be applied to hard surface, concrete, bituminous macadam, asphalt or similar material; but there would be a sufficient mileage of roads required in the neighborhood of the larger towns and cities to utilize this federal aid upon these in a way to fully conform to federal requirements. Furthermore, it would be the right of the people to supply their own funds as uniformly as possible in the several counties, not necessarily on the basis of distribution of dollars for construction, which would be unfair because of varying topography, etc., the cost of grading in some counties would be much greater than in others, but to limit the expenditures on top grading, graveling or other wearing surface to as nearly as possible uniformly expenditures per mile in each county. The plan might even be adopted to advantage of providing only the graded bridge and top-surfaced or gravelled surface in every county, requiring each county which may by reason of its own necessities desire concrete, asphalt or other permanent hard surface to provide the additional necessary for this increased cost or, in any event, as much to federal aid as such hard surface highway as each particular county may require.

Advantages Shown.  
Many advantages would seem to result from such plan of procedure.

First: The amount of money presently to be provided for construction of roads or otherwise would be decreased to the minimum.

Second: The cost of maintenance of the state highway system would be largely decreased, from what is now necessary maintenance of the present "unsuitable" system of roads. A properly graded and bridged and top-surfaced or gravelled surface road can be satisfactorily maintained for perhaps \$100 per mile per annum, certainly not exceeding \$200 per mile per annum, and its average cost of construction should not exceed at the outside \$10,000 per mile. If concrete or asphalt or hard surface is provided the cost would be at least \$20,000 per mile. It requires only a simple arithmetic calculation to show that the interest on the extra cost of the hard surface highway per annum will be more than twice as much as is necessary to satisfactorily maintain the cheaper top soil or gravel surface.

Third: It is recognized by the best highway engineers that highway construction is now at least only a development stage. It has been agreed by all who have made a study of the situation that few, if any changes or improvements have been made in hard surface construction. Concrete, as-

phalt, bituminous-macadam and other forms of pavement it is true have been improved and at present are the best available, but investigation and experiment now being made in practically all of the states of the union to determine and fix upon a better and more lasting form of hard surface and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. Would it not, therefore, appear to be better business policy to provide the foundation, such as bridges, properly graded highways provided with low cost "all weather" surface which can be maintained and probably of a cheaper construction cost will probably within a few years revolutionize the construction of hard surface for highways. ## R. O. T. C. LEAVES FOR OGLETHORPE

The R. O. T. C. camp at Georgia Tech, consisting of students from Georgia Tech, the University of Tennessee, Louisiana State University, and the University of Georgia, will leave Atlanta Friday morning for a nine days encampment in "pup" tents at Fort Oglethorpe. The camp will return to Atlanta July 23.

Ninety students compose the two companies of the R. O. T. C. company A being a motor transport corps, and company B an exclusive Georgia Tech company, being the signal corps. The companies have been encamped at Georgia Tech for the past two weeks. Georgia Tech being the first university ever chosen for a summer encampment of the R. O. T. C. Tech was chosen, according to the military officials, because of its fine military facilities. About half of the R. O. T. C. men are from Tech.

### CARNEGIE LIBRARY TO OPEN BRANCH MONDAY MORNING

The new branch of the Carnegie library, located at the corner of English avenue and Bellwood avenue will be opened to the public Monday.

The building has just been completed at a cost of about \$25,000. It is of light pressed brick with limestone trimmings and is completely equipped with the best library furniture.

It will have a collection of more than 2,000 books with up-to-date reference books, including encyclopedias and all those most needed by the children. It is expected that this will be one of the busiest of the library's branches as the building is located next to the English Avenue school, which is the largest elementary school in the city, having a registration of over 1,200 students.

Miss Irene Holloway will be the librarian. The library will be open daily from 1:30 to 6 o'clock, except Saturday.

This is the second branch library to be opened this year; Inman Park branch having been opened in April, and the seventh branch of the system.

### Grant Estate Heirs

### Prepare to Fight High School Plan

Declaring that at least three of the heirs of the late L. P. Grant estate, would fight the erection of a girls' senior high school on a ten-acre tract in the north end of Grant park, as recommended by the school board and bond commission, B. M. Grant, one of the heirs, stated Thursday that a court fight would assuredly follow in the event city council attempted to utilize any portion of the park for school purposes.

Mr. Grant contradicted persistent rumors around the city hall to the effect that the Grant heirs had decided to withdraw opposition to the use of the ten-acre plot for a school site. "There are three of the heirs who are unequivocally opposed to using the park for anything other than it was intended," stated Mr. Grant. "My aunt, Mrs. M. B. Armstrong and her daughter, Miss Laura Armstrong, would never willingly consent to the park being used for a school or any other purposes along that line. If

the school authorities proceed with their announced intention there is no doubt we will fight it in the courts."

### MRS. MORRIS TO ENTER RACE, FRIENDS ASSERT

Friends of Mrs. Lillian Morris, wife of Dr. Fred Morris, declared Thursday that she will make formal announcement, within the next few days, of her candidacy for election to the board of education from the First ward.

Mrs. Morris is a member of the board of lady visitors to the schools from the First ward. She is prominently identified with civic and school affairs of Atlanta.

## The Nashville, Chattanooga & St. Louis Railway

Nashville, Tenn., July 8, 1922.

### To All Mechanical Department Employees:

A rumor is being circulated that settlement of the present strike of shop employees is in sight and that such a settlement, when made, will result in all men, who refused to go out on strike and the new ones employed, losing their positions. So far as I am advised no settlement of the strike is in prospect, and further, any statement to the effect that men who have stood by the Company in this strike, or the new men who have been employed, will lose their positions, is absolutely untrue.

Our forces at all points are increasing daily and we confidently expect, within a short time, to have a full working force at all points.

The management expects to stand firmly by its promise to the men who remained with it and to the new men who came to it, and under no circumstances will any settlement of the strike be made with any one which will not protect them in the positions which they are acceptably filling.

Do not be misled by false rumors but remain a steadfast in your employment, in which the Company promises you the fullest protection within its power.

## Today---One Bargain After Another---High's!

### Smash!

### Odds and Ends of Dinnerware

5,000 Pieces at a Mere  
Fraction of Full Prices

ONCE every year, we get a big American dinnerware manufacturer's odds and ends. How Atlanta housewives welcome these Sales—with open china closets! No wonder; why, we're offering dinner plates—identical in pattern with some we carry in open stock at \$7.00 dozen—for 9c apiece!

### 20 Different Patterns

in the lot. All wanted pieces. Come to the Sale this morning, and if you're a mind to do so, you can pick out practically an entire set of matched pieces—for a song!

### Pieces at 9c

- |                    |                   |
|--------------------|-------------------|
| —Dinner plates     | —Soup plates      |
| —Breakfast plates  | —Oat meal dishes  |
| —Salad plates      | —Cups and saucers |
| —Bread and butters | —Fruit saucers    |

### Pieces at 19c

# RADIO DEPARTMENT

## MRS. BUTLER SINGS FOR WGM TONIGHT

Program of Popular Songs Will Be Broadcast by Constitution at 9 O'Clock Period.

Another program of popular vocal music that promises unusual pleasure for the southern radio world is the one to be transmitted tonight by Mrs. Olive Butler, talented Atlanta soprano, who will sing six voice selections at the 9 o'clock period.

Mrs. Butler is a newcomer to WGM's audience, but her previous appearance tonight is due to please them. She is reputed to be an accomplished vocalist and her voice has been praised by many judges of good music.

Mrs. Butler will sing "Somewhere a Voice is Calling," Bartlett's "A Dream," "Kiss Me Again," "In the Garden of My Heart," "The Rose," and "Now I Lay Me Down to Sleep." All the numbers are familiar and those who will hear them tonight will be delighted to hear their favorite songs so well over radio. Mrs. Butler will play her own accompaniment on the piano.

### Fee System Changed.

Thomasville, Ga., July 13.—(Special.)—At the meeting of the city council this week an ordinance was introduced changing the fees of the city clerk by removing the fee of a dollar from every case on the docket and making the fee payable only for those cases tried and convicted. The ordinance went on its first reading.

## NOTICE!

When the plant of the Shepard Chemical Company, of Wilmington, N. C., incorporated in 1901, burned last August, Shepard Fly and Insect Killer was temporarily unobtainable.

The many friends which this safe and sure insect killer has made will be glad to know that the company is now operating under new management, in New York City, with executive offices at 53 Park Place.

Users can now buy the old reliable SHEPARD FLY AND INSECT KILLER from their druggist or grocer who either has it in stock or can procure it quickly from his jobber.

Safe, Sanitary, Effective  
Guaranteed to Kill All Insects.

## FIFTEEN MINUTES OF RADIO EACH DAY

Formerly Technical Electrical Expert for United States Government

### LESSON NO. 94. Battery Circuits.

In general, a cell is a single unit used as a source of electrical energy, while a battery is two or more cells connected together in any of three ways. The three methods of connecting cells together are in "series," in "parallel," and in a combination of these two ways known as the "series multiple" or "series parallel" connection. The way in which the cells are connected in any particular circuit depends upon the voltage or current desired for operating the apparatus in the circuit.

The average voltage of the ordinary cell or carbon-zinc type is about one and one-half volts per cell, and it makes no difference how large this cell may be built the potential across the terminals will not be more than this amount. Similarly the lead acid type of storage cell has a terminal voltage of about two volts which is also independent of the size of the cell.

It is necessary therefore to resort to some other method than merely constructing a large cell in order to secure a voltage higher than may be secured with a small cell. The "series" method of connecting cells accomplish this purpose.

For the voltage of the individual cells added together gives the voltage of the group for example a 22 1/2 volt "B" or plate battery for vacuum tube work has 15 small dry cells connected in series. Also the filament which requires a source of six volts is supplied ordinarily by a storage battery made up of three cells connected in series, each cell having a voltage of about two volts.

While the series connection gives a voltage higher than the voltage of a single cell the current output of each cell remains the same as in a circuit where the current is the same and furnished by a single cell. In order to get a greater current than can be secured with the series combination or the single cell we must employ the "parallel" connection. By using this arrangement the current output of two cells in parallel is equal to the sum of the output of each cell but the voltage of the combination is the same as the voltage of the single cell.

Therefore, if 100 dry cells were connected in series the voltage would be 100x1.5 of 150 volts but the current output would be that of a single cell. If the same cells were connected in parallel the voltage of the combination would be only 1.5 volts but the battery would have a current output of 100 times that of a single cell.

Dry cells have a comparatively high internal resistance and the current output for closed circuit work such as lighting vacuum tube filaments is very low which requires that several cells be used in parallel, while the voltage requirements for this service are such that 4 cells must be connected in series in order to obtain the required voltage. Such a combination is called the series parallel or series multiple connection of cells.

The series parallel connection of dry cells for vacuum tube work is the only practical way of using dry cells for filament lighting and cells used in this way will be found to last longer than if used in individual groups.

(Copyright, 1922, for The Constitution.)

## ANSWERS TO 9 QUESTIONS

Radio Editor—Can you please tell me what is needed to make a receiving set that can receive a radius of about six hundred miles? Could a variometer and variocoupler be used in this set? Would this be a two-stage receiving set?

G. K.  
It is very difficult indeed to guarantee a set that will receive any predetermined distance. Some ordinary regenerative sets without amplification can receive the concerts over this distance, while in other cases a two-stage radio frequency amplification are needed. The best thing to do is to first buy or make a regenerative set of the variocoupler and then add amplifiers if you find them necessary.

Radio Editor—I have a home-made crystal set, an eighty-foot aerial, and 2000 ohm receivers. Sometimes I can hear the concerts clearly, but at other times nothing is audible excepting code. Is my hook-up O. K.? Have you any suggestion?

W. K.  
You have not your set connected in the most efficient manner. It would be best for you also to purchase a fixed phone condenser. Connect one end of the coil winding to the ground lead and also to one side of the phone condenser. Connect your phone to the other side of your detector and the other side of your detector to one of the sliders to your aerial lead. Now connect your phone to the phone condenser. This circuit will prove much better than the one you are now using.

## ATHENS TO HOLD FAIR IN OCTOBER

Athens, Ga., July 13.—(Special.)—A big fair beginning probably October 13, was decided upon here today when representatives of the chamber of commerce, Rotary, Kiwanis and other civic organizations gathered in conference. It is the plan to let the fair this year be a nucleus for greater sectional fairs within the coming years. The temporary organization is composed of City Engineer J. W. Barnett, chairman, and Fleetwood Lanier, of the Kiwanis club, secretary.

## PLEASING MUSIC BY LOCAL TENOR

F. B. Fuller Fulfills Expectations of Radio Listeners in Recital Thursday Night.

Seldom have music lovers in the southeast heard prettier music sung in a more pleasing voice than they

F. B. FULLER.  
Who sang for WGM last night.

did last night when F. B. Fuller, popular Atlanta tenor, gave a recital of six songs for WGM at the 9 o'clock period.

Mr. Fuller has been heard before over radio, having given a recital at the 9 o'clock period once and having sung once for a Sunday afternoon concert. Those who had heard him then expected something especially fine. They got it in ample measure.

Even in the lighter airs, Mr. Fuller's voice swelled and soared in operatic timbre and in the one grand opera number in the set, "The Romance," from Donizetti's "L'Elisir

## Ban on Politics in State Highway Department Urged

The state highway department of Georgia should be kept absolutely free from politics and all Georgians should join in a movement to keep the highway department an efficient and non-political organization, according to a statement issued Thursday by the Atlanta Automobile Dealers' association.

Work of the department is commended in the statement and a plea is made that the affairs of the department be conducted by an executive who is not hampered by politics and who has full power to name efficient men to carry on the work under him.

Following is the statement: "Road building is far too important that the highway department of Georgia should ever be made a political machine and we deplore the report referred to by Mr. Hollomon in The Constitution that it may become involved in politics. Our hope is that it may always be an impersonal, non-political organization and we believe we voice the sentiment of a large majority of the citizens of the state.

"We have always regarded our state highway department as one of the best in the union because the roads are constructed and maintained under the skilled direction of the highway engineer who is held responsible for the manner in which the work is done. Naturally, he should have full authority to employ and discharge the men under him, otherwise the work could not be an efficient organization. It would be worse than folly for any other than the directing head of the road working organization to name the men to do the road work or any of the engineering work.

"The same things would apply to the selection of materials and machinery. This requires technical knowledge as well as sound business judgment.

"All Georgians should join in helping to keep the highway department an efficient and non-political organization, as we believe it has ever been.

"Naturally, the Atlanta Automobile Dealers' association is interested in good roads throughout the state, and we feel like we are in a measure familiar with the progress of road work and with the highway department."

"The federal road bureau carefully considered all the contracts, and we are sure the work has been well done and that we have a very efficient department."

## FOREST TOUR PICTURE SCORING GREAT HIT

Unqualified approval and commendation is being won this week at the Howard theater by the beautiful scenic film classic, "Dixie's Mountain Majesty," expressions of many hundreds who have viewed the pictures which are being offered under the joint auspices of The Constitution and the Southern Enterprises.

Capacity audiences have crowded the theater all this week and Manager DeSales Harrison has been besieged with compliments on the unusual showing of state's natural beauties. Almost everyone who has seen the picture has gone away from the theater wondering why Georgia has neglected to advertise its scenic grandeur long before The Constitution arranged its recent trip which resulted in the photographing of the scenes.

In spite of the deluge of rain which began on the second day of the trip and lasted throughout the entire week, the pictures show a clearness and charm rarely ever attained by any like picture ever shown here. James B. Buchanan, local producer of industrial, educational and scenic films, photographed the various scenes embodied in the picture.

It is certain that this picture will be welcomed all over the country, judging from the expressions of a large number who have witnessed it here. A number of prints have been made and beginning Monday the Southern Enterprises will send the films to various cities in the state and elsewhere.

## \$5,000,000 LENT COTTON GROWERS

Constitution Bureau, Raleigh Hotel.

Washington, July 13.—(Special.)—The War Finance Corporation announced that an advance of \$5,000,000 to the Georgia Cotton Growers' Co-operative association had been approved for the purpose of financing the orderly marketing of cotton in the state.

Negotiations for the advance were conducted through the officials of the cotton growers' association, J. E. Crowell, president, and W. A. Reeves, vice president, the announcement stated. Both officials of the association make Atlanta headquarters.

Coming as the announcement does in the face of other advances to southern cotton growers, the funds are expected to materially stimulate activity in the fall marketing. Officials of the War Finance Corporation stated that approximately \$60,000,000 have already been advanced in the south this season for the financing of the crop. And it is expected that today's advance will be followed by additional loans throughout the cotton belt in the near future. Negotiations for several of these advances are now under way, officials stated.

Only recently the cotton growers of North Carolina were granted a loan of \$10,000,000 for financing the crop. A like sum was also approved for South Carolina, while \$7,500,000 was allotted to the state of Arkansas and \$6,000,000 in Oklahoma this week.

Officials of the War Finance Corporation stated that additional announcements concerning the state of Georgia would be made from time to time, and that petitions for funds with which to finance the orderly marketing of cotton in the state would be approved whenever conditions demanded.

Georgia is assured a fund of \$10,000,000 for financing the cotton crop this year by the action of the War Finance Corporation. Recently the Atlanta clearing house announced a \$5,000,000 pledge of credit.

During his visit here shortly before this amount was pledged Eugene Meyer, Jr., managing director of the corporation, assured local officials of the Georgia Cotton Growers' Co-operative association of his interest and efforts to provide for additional funds for financing the cotton crop in this state.

## BANK SHORTAGE BARED; EMPLOYEE SHOTS SELF

Statesville, N. C., July 13.—C. E. Pennington, assistant cashier of the First National bank of Statesville, late tonight fired a bullet through his head in his home here and died 45 minutes later. The tragedy followed announcement today of a shortage of approximately \$85,000 in the accounts of cashier John W. Gay, Sr.

The directors of the bank took immediate action, it was said, to provide against any loss to the depositors and the bank is being operated with President R. A. Cooper, acting as cashier.

## LAND AND CHAPMAN SPEAK AT MEETING

Athens, Ga., July 13.—(Special.)—F. E. Land, supervisor of industrial rehabilitation in Georgia, working under the direction of the department of education, and Paul Chapman, supervisor of agricultural education in Georgia, were the principal speakers on the vocational week program here today.

Their addresses were delivered in the University of Georgia chapel and were heard by the large delegation of vocational teachers representing the entire state.

John Slaughter—an added attraction—at Warm Springs this week-end.

## Armstrong's New Super Regenerative Circuit

Demonstrated before the Institute of Radio Engineers on June 7, by Maj. Edwin H. Armstrong, creator of the regenerative circuit, is 100,000 times more sensitive than the regular vacuum tube circuit.

Only two vacuum tubes are used, and do the work of eight—securing undistorted amplification. Outside aerial unnecessary! More simply to construct and operate than any other super-regenerative circuit. Does away with all interference from spark stations!!!

Send \$1 for complete blue-print, diagrams and full instructions for assembly. Make one of these super-sensitive receiving sets.

Automatic Player-Piano Co.  
63 N. Pryor St.  
We guarantee to supply the complete parts for \$30 postpaid.

## Had Your Iron Today?

## Work Brains—Not Digestion

HERE'S an ideal hot-weather luncheon!

Two packages luscious Little Sun-Maid Raisins—one cool glass of milk. Big men don't need more.

290 calories of energizing nutriment in the little raisins. Pure fruit sugar, practically predigested so it acts almost immediately, yet doesn't tax digestion and thus heat the blood.

There's fatigue-resisting food-iron also in this lunch.

Vital men eat like this and resist the weather. Don't work their digestion because they want to work their brains.

Try it for a few days and you'll feel better.

## Little Sun-Maids Between-Meal Raisins

## POSTMISTRESS HELD FOR EMBEZZLEMENT

Aiken, S. C., July 13.—Mrs. Algeron E. Beard, postmistress at Warrenville, this county, was arrested yesterday afternoon on a charge of embezzling \$1,161 of funds from the Warrenville postoffice.

Attention, Traveling Public

To protect movements of trains handling U. S. Mail and to provide power for moving perishable food-stuff, the SEABOARD AIR LINE RAILWAY finds it necessary to temporarily discontinue its trains 7 and 8, operating between Atlanta and Birmingham, effective with the last train leaving both terminals midnight, July 12.

Adequate arrangements having been made to protect local service by putting necessary stops in schedules of its fast trains 5, 6, 11 and 12.

FRED GEISSLER, Aet. General Passenger Agent, Atlanta, Ga.

## News of Society and Woman's Work

### Corra Harris Addresses Business Women's Convention

Chattanooga, Tenn., July 13.—President Lena Lake Forrest today presented to the annual convention of Business and Professional Women's clubs a plan for the creation of a fund, proposing to set aside the money received from the sale of emblems first be used for the retiring of all indebtedness and thereafter for promotion of activities of the organization. Action on the proposal went over.

The annual banquet was held at the Chattanooga Golf and Country club tonight and was featured by addresses by Corra Harris, on the subject of "The Great Essential," Mrs. William Brown Meloney, "The Changed Attitude of Business Men Toward Women in Business," Mrs. Frank Meloney, "Ideal Business Women," and Miss Lena Madeline Phillips, "From Then 'til Now."

The report of the budget committee as adopted provided for the expenditure of practically the same amount as the preceding year and through the same channels. It includes a contingent fund to be given state and local clubs for organization work.

Miss Georgia Emery, chairman of the committee on official magazine,

presented a report and recommendation which was adopted that a subscription committee be created in every club to further the use of the magazine in making up programs and getting publicity for the federation. Committees on advertising in the local clubs and appointment of a publicity chairman in every club to keep the magazine informed of activities, were also urged.

A lively tilt occurred over the printing of the magazine when a Cincinnati delegate declared that by having it printed in Cincinnati the federation could save \$3,000 of the total now spent by publishing it in New York. The open and closed shop question was raised during the discussion. An effort to interrupt Miss Sears, editor, by the Cincinnati delegate, resulted in the former declaring that if the federation wanted a cheap magazine it would have to secure a cheap editor. The question was finally referred to the magazine committee.

Miss Mary Stewart, chairman of the legislative committee, reported on activities of the year, outlining the status in congress of bills introduced by the convention at Cleveland last year. A recommendation calling for the reduction in armament was referred to the resolutions committee.

## SOCIAL ITEMS

Miss Thelma Preston is spending some time with relatives in Knoxville, Tenn. ...

Mrs. J. K. Arnold has returned from a stay of several weeks in Marietta. ...

Mrs. George H. Preston, of Augusta, will arrive Monday to visit her parents, Mr. and Mrs. W. P. Donough, on East Tenth street. ...

**CURED BY A NATIVE HERB**

On board a vessel bound for India recently a man was bitten by a poisonous reptile; both the ship doctor and a famous surgeon failed to control the poison fast spreading through his system.

In a day the vessel reached port. An Indian medicine man was sent for, who produced a native herb which quickly allayed the poison and the man's life was saved.

Roots and herbs are nature's assistants in combating disease. That well-known medicine for ailments peculiar to women, Lydia E. Pinkham's Vegetable Compound, is prepared from roots and herbs, possessing medicinal properties of great value in the treatment of such ailments.

This is proved by the letters of recommendation we are continually publishing in this paper for it.—(adv.)

### Miss Brown Hostess Off Family Re-Union At Cherokee Lodge

Miss Sally Eugenia Brown was hostess at a family luncheon yesterday at her home, "Cherokee Lodge," on Peachtree road, this occasion an observance of the marriage anniversary of her parents, the late Governor and Mrs. Joseph Emerson Brown, and the birthday of her mother who, had she lived, would now be 90.

The family reunion on this double anniversary is an annual observance at which Miss Brown is hostess and was surrounded yesterday by the beauty of mid-summer flowers used in decoration.

In the party were Ex-Governor and Mrs. Joseph M. Brown, of Marietta; Dr. and Mrs. E. L. Connally, Mr. and Mrs. Elijah Brown, Mr. and Mrs. George M. Brown, Mr. and Mrs. Warner Martin, Mr. and Mrs. Hal Hentz, Thomas Connally, Mr. and Mrs. Joseph Brown, Jr., Mr. and Mrs. Charles Brown, of Marietta; Mr. and Mrs. Brooks Mell, Mr. and Mrs. George Brown, Miss Penelope Brown, Joseph Emerson Brown and Marcus Johnson Brown.

### Mrs. Bailey Honored At Luncheon

Mrs. Benjamin Mart Bailey, of Fort Leavenworth, Kansas, the guest of her mother, Mrs. Charles A. Davis, was honor guest at an attractive luncheon Thursday at the Piedmont Driving club, given by Mrs. Charles Rembert Marshall, of Nashville, Tennessee, who is the guest of her parents, Mr. and Mrs. Sanders McDaniel, on Pace's Ferry road.

Covers were placed for ten guests. The luncheon table, which was placed on the veranda at the rear of the club, was attractively decorated with French baskets of summer flowers.

### House Party At Clayton, Ga.

Mr. and Mrs. William Akers, have returned from "Kingwood," Clayton, Ga., where they have been entertaining at a house party, at the beautiful summer home of Mr. and Mrs. George E. King.

The guests included Dr. and Mrs. George L. Cook, Mr. and Mrs. J. T. Peacock, Miss Marion Peacock, Mr. and Mrs. Allan Artley, Mr. and Mrs. Bruce, Mr. and Mrs. Julian Thomas, Jack Harlan, E. F. Coney, of Jacksonville, Fla.; Mrs. J. W. Dillon, of Savannah; Ida and William Akers, Jr.

Mr. and Mrs. John H. Holland are touring north Georgia in their car, stopping at the various summer resorts.

### Today's Calendar

#### SOCIAL EVENTS

Mrs. Eugene R. Black, Sr., will entertain the Friday Morning Reading club at her home on Peachtree road.

Teas at the Atlanta Woman's club.

Circle No. 2, of the Gordon Street Presbyterian church will give an ice cream festival on the lawn of Mrs. M. C. Bennett's home, 83 Cascade avenue, today from 3 to 9 o'clock.

Mrs. Frank L. Stanton will be hostess at a dinner party this evening at her home on Highland avenue in compliment to Mr. and Mrs. Chesley Howard Matthews.

Mrs. V. I. Masters, of Louisville, Ky., will be honor guest at a tea to be given by Mrs. Homer Dawson and Mrs. Hugh Carmichael this afternoon at the Woman's club.

#### WOMEN'S MEETINGS

Atlanta chapter, No. 57, Order Eastern Star, will hold its meeting today at 8 o'clock in W. D. Luckie lodge room. Lee and Gordon streets.

The woman's auxiliary of the Georgia Baptist hospital will hold its regular monthly meeting today at 10:30 o'clock.

Mrs. Julius Wasser entertained a number of friends at luncheon Tuesday at her home on Angier avenue in compliment to James K. Dobbs of New York city.

The table was attractively decorated with lace cloth and basket of Shasta daisies formed the centerpiece, with silver candlesticks bearing pink tapers placed at intervals.

Mrs. Lorraine Sale will entertain at an informal dance at her home in Inman Park, this evening, in compliment to Billy Flanders, the guest of Mrs. L. C. Flanders.

The guests will include Misses Catherine Campbell, Katherine Ellis, Naomi Walker, Sarah Slaughter, Dorothy Bartlett, Dorothy Hale, Florence Obeir, Leonora Anderson, Sarah Bigham, Mrs. Lom Witherington, Mrs. C. T. Puleston, and J. B. Willingham, Allen Bartlett, Billy Plumb, Cecil Jones, John Stony, Fred Sale, George Echols, Harold Sheffield, Rupert Evans, Fred Robinson, C. G. Puleston, and Tom Witherington.

Talks in Spanish Attract Interest.

Increasing interest is being shown in the series of talks in Spanish now being given in the Carnegie library every Friday afternoon at 3:15.

Arthur Reynolds will be the speaker today, Dr. Guy King, consul of Cuba, next Friday, and Mr. Reyes, of Mexico City the week after.

These talks have been planned primarily for students of Spanish and others who have some knowledge of this tongue, and desire to master the language now spoken in eighteen republics of the new world.

The assembly room in the basement of the library is open on Fridays from 4:30 to 6:00 p. m., and those who find it convenient to do so are urged to come early. There is no charge for admission.

Mrs. Anzie Grove entertained an informal afternoon party at her home at "Riverview" last Saturday afternoon, in compliment to Miss Marion Clark of Sanford, N. C., who is leaving for her home this week.

Among the ones invited were Misses Ruby Cowser, Louise Terrell, Eunice Rustin, Marion Clark, Jessie McCloud, Lottie McNair and Iva Mae Little.

## Side Talks by Ruth Cameron

### RAISING THE SPEED LIMIT.

One of the largest states in the United States a law was passed last year raising the speed limit at which automobiles can travel.

Where are we going to end? The pedestrian will have no right in the streets at all if this keeps on. We shall surely have to have underground tubes for him in the cities and leave the streets to the automobiles.

Doubtless, you are shuddering at the thought of the number of deaths that this law's raising the speed limit will cause.

Save Your Shudders. Save your shudders until I tell you something. In the year since that law was passed the number of deaths has been reduced by one-half.

No, your eyes are not deceiving you.

The reason for the reduction is this: The speed limit was made reasonable and then enforced.

I know of another state in which the outside speed limit in the open country is 20 miles an hour. If I had \$1 for every automobilist who has never exceeded it, do you think I would have to pay an income tax? The law is a joke. No one tries to stay within the limit and the result is that there is no limit on speed except the fear of getting caught.

Too Many Laws. Too many laws and too strict laws always defeat their own end.

A group of clergymen, met for civic reform, tried this interesting experiment. They read over all the city ordinances to see what they were and if they were keeping them. There was

### "TO BE OR NOT TO BE"— THAT IS THE SLEEVE

No sleeve or much sleeve—that is strictly up to you now that many of the new frocks feature flowing draped sleeves that may be detached on an instant's notice.

not one who did not break some of those ordinances! There are few communities that would not be better off with half or a quarter as many laws really enforced and respected.

For Better Children. And there are many homes where the same thing is true. Better let Johnny's bedtime be 8:30 and see that he goes, than have it theoretically 8 and actually somewhere between quarter past eight and quarter of nine (the peace of that half hour being punctuated at regular intervals by "Johnny, go to bed," "Just a minute, Ma, I want to finish this chapter," "Johnny, you must go to bed," "Yes, Ma, I'm going," "Johnny, if you don't go to bed—").

Fewer prohibitions and commands and stricter enforcement of those few, reasonable requirements complied with as a matter of course, will make for peace, harmony, efficiency and better disciplined children.

Tomorrow—Do Judge by Yourself.

## HOUSEHOLD SUGGESTIONS

When Papering. Do not forget that large patterns and dark colors will make a room look smaller, while a plain or striped light colored paper will give the impression of increased size.

Notebook Items. Keep the shoes on shoe trees when not in use. Water boils at 212 degrees Fahrenheit. It freezes at 32 degrees. Vaseline will stop the squeaks of chairs, beds and all kinds of hinges. Never scrape a frying pan with a knife; it is likely afterward to burn if you do.

Never leave evaporated milk in the can. Empty it at once into a glass or earthen jar.

Musky Teapots. The metal or enamel teapot that has become musty can be sweetened by filling it with boiling water into which has been dropped a red-hot cinder. Close the lid and let stand a while. Rinse with clear water.

### Exhibit of Paintings To Be Continued.

The paintings by Blendon Campbell, which were on exhibit at the Woman's club for some time, have been rehung, and are ready for inspection and study. This exhibition has proved a valuable incident in the local art life, and for this reason the showing will be continued.

## The Constitution's Patterns

### A SMART HOME DRESS.

3992. Since domestic science has turned the drudgery of house work into a noble profession, the house dress has come forward in attractive guise in pretty colors and dainty materials. The model here depicted has outstanding pocket sections, with roomy pockets. On "picking up" days, these are ideal for stowing things away to be carried to "where they belong." This is also a good garden or porch dress. The pattern is cut in six sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. A 38-inch size requires 57-8 yards of 32-inch material. The width at the foot is 2 yards.

Pattern mailed to any address on receipt of 10c in silver or stamps.

### A PRACTICAL SEAMLESS APRON.

Pattern 3658 is here illustrated. It is cut in four sizes: Small, 34-36, medium, 38-40; large, 42-44; extra large, 46-48 inches bust measure. A medium size will require 25-8 yards of 36-inch material. Figured percale.

Pattern mailed to any address on receipt of 10c in silver or stamps.

### Ladies' Aid to Serve Ham Dinner.

The Ladies' Aid of St. Philip's cathedral will serve a baked ham dinner at their lunch room, 16 Washington street, Friday, July 14, from 12 to 2:30 o'clock.

Menu—baked ham, brown dressing, combination salad, hot rolls, iced tea or coffee, bananas and cream. Price 25c. Public cordially invited. Menu changed daily. Dinner served every day except Sunday.

### Miss Selman, Hostess At Matinee Party.

Miss Pauline Selman, of Douglas-

ville entertained at a matinee party at the Forsyth theater on Tuesday afternoon, in honor of Miss Gladys Walpole, of Charleston, S. C., the attractive guest of Miss Agnes Galt, on Park Lane. After the matinee the guests were served tea at the Daffodil.

Those present were Misses Agnes Galt, Gladys Walpole, Sara Selman, Mary Taylor, Pauline Selman, and Miss Leonard Munford.

For the Forgetful Person. If you are absent-minded take precautions against accidents. Set your alarm clock to remind you of the cake that is in the oven. Keep a tablet in the kitchen and jot down anything you fear will be forgotten.

The reason for this return is fastidious women are in revolt against bright colors and crude ornamentation. "But," despairingly cry the dress-makers, "why not return to gray and mauve and beige? Black is exhausting to the eye. Six years of it was too much for the nerves. We have turned and, twisted it until nothing new is left."

There are whispers among economists that the reason so many smart Frenchwomen are wearing black is that they have not bought new frocks this season. There is a strong undercurrent of gossip about the new frocks among the best French set and the middle classes in wearing apparel.

The French dressmaking houses are filled with people who are new to the game of buying expensive clothes, just as the French opera houses are unfamiliar audience and luxurious motor cars hold unfamiliar faces. But be the reason what it may, for the lack of change, the fact remains that women have shown extraordinary fidelity to a few outstanding fashions since the winter of 1915.

Among these fashions is beige. This is as smart this season as it was in the beginning. No woman feels herself out of the picture when she chooses it for any kind of garment. It is to the majority what dark blue was.

The sketch shows a frock of beige chiffon, a fabric which has returned to fashion. The embroidery is light brown, which is a new touch. There is an overskirt with a sash tied at the back and a bathing suit bodice. Surely a simple outline of a frock, one that will cause no one perplexity.

The lace hat is of beige, with nauticisms at one side.

The combination of brown with beige is to be expected, but the truth

## AT WOMAN'S WINDOW

BY W. L. GEORGE

Most women are afflicted with a husband who occasionally generates an idea. Few women produce general ideas; these are seldom interested in "The Development of the Race." The average woman keeps her nose well down to things which in her opinion really matter, health and wealth, frocks, love, theaters. They do not, as a rule, have any use for the windy ideas in which most men take their pleasure. Thus, on the railroad they have to submit to their husbands who are interested in record runs while the saner women only want to know whether the particular run they are engaged in will be a record. It can't be helped. It is one of the weaknesses of the male that he engages in generalities of which he makes daydreams. It is no use trying to alter him. A man must play either with his hands or with his head. The one thing that it is dangerous is that the woman should convey to her husband that she thinks his games silly. A wife should understand that general ideas have for men a peculiar value, that they enable men, working perhaps in a mean sphere of life, to connect up with the subjects that are handled by statesmen and by the presidents of gigantic corporations. Man, however low his estate, strongly feels that he inherits a little of the male prerogative to govern the world. If he cannot do, he must talk. His ideas are important to him, and the wife who wants to continue to be loved must do more than listen. She must take an interest in these queer, swollen views that seem visionary. She must provoke them, discuss them, always politely, always willing to be instructed. She must not gain such instruction and she may feel a little bored, but then her conversation bores her husband now and then. It is a fair exchange.

(Copyright, 1922, for The Constitution.)

## DRESS BY ANNE RITTENHOUSE

There Is No Change in the Fashion for Beige This Summer and the New Modish France Show That Europe Likes the Color as Well as America. So Those Who Can Wear It May Go On Indulging in It to the Height of Their Desires.

Ever since the war started there has been a curious unanimity in certain fashions and an unusual continuity of them. There are changes enough to irritate reformers and quite enough to stimulate the buying of new clothes; but, sifted down into a few facts, it is evident that women hold fast to certain fundamental fashions merely varying the details when the seasons change.

Not since the Middle Ages have women held so fast to the chemise frock, the use of crepe de chine, the string skirt about the hips, and the selection of black and beige. Even

is that it is liable to appear in unexpected places. It is the color of the lower, however, and by the combinations are daily sought for it.

### THE HOUSEHOLD

Edited by Anne Rittenhouse.

THINGS HARD TO CLEAN. There is a way to clean almost everything that gets soiled if you only know how best to accomplish this result.

Take water bottles and cruets, for instance. Some housewives spend many minutes trying to get them clean. It is possible to accomplish this by means of shot, which should be shaken around with soapy water and then left to stand for a while, but it is much easier to clean these things by pouring in a little hydrochloric acid, letting this stand a little while, pouring it out and following it with a little ammonia water. It is folly spending time scraping and scrubbing off windows, or other places when a little turpentine allowed to soak in and then rubbed off will turn the trick in a minute.

Even when you have no use for kerosene for lighting or heating, you should have a little on hand to use in cleaning. It is the best thing you can use on rust. Simply let it lie on the rust spots until dissolved and then rub off with more kerosene. Kerosene is excellent to use in cleaning wash basins and bathtubs. It has the advantage that it does not scratch or mar the surface of the basin or tub, though it has the drawback of an unpleasant odor. If it is used thoroughly once a week, you will find that basins and bathtubs may be kept clean more easily.

Ammonia is another agent that keeps basins and bathtubs clean, but many housewives object to this because it is hard on their hands. If you like, you may use ammonia and thus avoid letting it touch your hands. (Copyright, 1922, for The Constitution.)

### Guests of Mrs. Flanders Honored by Supper-Dance.

Paul Johnston entertained at an informal picnic supper and dance, Wednesday evening, at the home of Mr. and Mrs. C. G. Puleston, 49 McLen- dore avenue, in compliment to Billy Flanders, the guest of Mrs. L. G. Flanders, of Inman Park.

A number of delightful entertainments have been planned in honor of Mr. Flanders. The guests Wednesday evening included Misses Katherine Ellis, Sarah Bigham, Dorothy Bartlett, Lorraine Sales, Nancy Linthicum, Laurie Linthicum, Lucy McCall, of Birmingham; Leonora Anderson, Julia Man- ston and Paul Johnson, Billy Flanders, John Stoney, Allen Bartlett, George Echols, Joe Tliver, Cyrus Sharp, George Sharp, Ross Green, Mr. and Mrs. Puleston and Mr. Evans.

### Bridge Party For Visitors.

Mrs. Lynn Brannon and Mrs. Howard Graves entertained at a bridge party Friday afternoon at the East Gate Country club in compliment to Miss Susan McMane, Mrs. A. S. Jackson and Mrs. Jacob Kreis, Jr., who are the guests of Mrs. Lamar Pierson.

Following the game tea was served. The table was attractively decorated with garden flowers. The prize for top score was a novelty French doris and a hand-made handkerchief was given for consolation.

Invited to meet the honor guests were Miss Mildred Brannen, Mrs. Carl Stewart, Mrs. Paul Fong, Mrs. P. S. McElhenny, Mrs. Warren Davis, Mrs. W. E. McDonough, Mrs. A. E. Ramsey, Mrs. Elizabeth Goodrich, Mrs. Nina Brown Cheshire, Mrs. Maurice Sullivan and Mrs. Lucius P. Beckham.

### Habersham Chapter, D. A. R., Meeting.

The regular monthly meeting of the Joseph Habersham chapter, D. A. R., will be held Saturday afternoon, July 15, at 3 o'clock, in the chapter house, corner Piedmont avenue and Fifteenth street.

Mrs. Urie Atkinson, regent, urges all members to attend, as matters of importance are to be discussed.

### Who's Who in the Story.

Diana Langley, who possesses a superlative degree of beauty, is the daughter of a wealthy family. She is a young woman of twenty, who has been devoted for years, impetuously, to a young man named Stephen Dale, who is a young man of twenty, who has been devoted for years, impetuously, to a young woman named Diana Langley. The story is a love story, and it is a story of a young man and a young woman who are in love with each other. The story is a love story, and it is a story of a young man and a young woman who are in love with each other.

### INSTALLMENT NO. 65.

"Her fiancé!"

Bowing low, Dominguez said, with a smile that showed his flashing white teeth:

"Ah, greetings, senorita! It is happiness to see you."

Diana gasped indignantly:

"You—here?"

His eyes were mocking.

"But did I not say, senorita, that we should meet soon again, and that does Dominguez not always keep his word?"

Diana looked him over curiously. He was dressed in the most immaculate of evening attire. Judging from his appearance, he might have been a leisurely man of fashion who had never been outside New York except for London, Paris or Monte Carlo.

The bronze of the desert sun had only made his dark face the more distinguished and interesting.

But Diana's keen eyes noted that he held his left arm queerly and that it seemed larger than the right, which was extended to assist her into the elevator.

She drew back.

"I am going up," she said, "Doctor Borden and his sister are here."

He motioned the elevator to descend without him and turned back to her with his flashing smile.

"I know quite well, senorita, since I arrived on the same train."

Diana looked at him in amazement.

"You took the Sunset when we did?"

He bowed.

"You were too busy discussing Senator Dale with the ticket agent to note when I boarded the train. Ah, what an irresistible senorita! So many handsome senoritas you have."

Diana flushed.

"Where is Lynn Johnston?" she demanded suddenly.

Dominguez's eyes flashed amusement.

An Embarrassing Situation.

"Alas, Senator Johnston has refused to be my guest longer. He leaves—three, four, maybe five days ago."

"Indeed?" Diana's brows raised.

"The ticket agent told me that he had not boarded a train there."

"But naturally, senorita, since I myself drive him twenty miles to meet the eastbound train."

"Oh, then he didn't come to San Francisco?"

"No, senorita, he goes to New York."

"How curious!" Diana was puzzled.

"He told me he had urgent business in California; besides, it's his home."

Dominguez shrugged.

"Diana!"

Marjorie Langley's voice, in incredulous accents, floated down the corridor.

Diana turned, aghast, to see Marjorie and Admiral Armstrong bearing down upon them.

"Whatever you are doing here?" demanded Marjorie. "We have been waiting for you in my sitting room."

"How do you do?" Diana extended her hand to her uncle by marriage with as much composure as she could summon.

"I am sorry to have kept you waiting, but I had to see the kind people who brought me here—they are upstairs."

The Admiral looked at Dominguez curiously and Marjorie's well-shaped brows shot up.

"Really? So this is your gallant rescuer?"

"Oh, no, no!" stammered Diana. "This is—this is—someone I met in New Mexico. Senator Dominguez, my aunt, Miss Langley—and Admiral Armstrong."

Dominguez bowed low, his insolent gaze appraising Marjorie, sweeping indifferently over the Admiral.

"To me was given the good fortune to do a trifling favor for the senorita and her fiancé," he murmured.

"Her fiancé?" echoed Marjorie and the Admiral simultaneously.

Diana flushed crimson. She had always known this moment would come!

The Tell Tale Sound.

"Yes," she broke in hastily, "Lynn Johnston, you know."

Turning her back deliberately on the Spaniard, she looked squarely at her aunt and the grave-faced Admiral and lowered one eyelid momentarily.

Marjorie's expression was unreadable.

"Indeed?" she said coldly. "How very interesting! We shall be glad to hear more about this later. Just

now, you will have to excuse us, Mr. Dominguez, as we are already late for supper engagement."

"It will be my pleasure to see you again," murmured the Spaniard courteously. "You have but to summon me and I will come."

He stepped back as the elevator grille swung open.

The graceful gesture of his left arm brought it sharply in contact with the metal grille.

There was an exclamation in Spanish, quickly suppressed, but Diana, looking back as she stepped into the car, noted the expression of anguish on Dominguez's face.

Before the elevator dropped from view, he had recovered his poise, but he held his left arm cupped in his right hand.

Diana knew at that moment that there was no further doubt about identity of the man who had endeavored to climb into her window that night at the Borden's.

That left arm of Dominguez's had been the target for the doctor's bullet.

Marjorie maintained a grim silence while the elevator descended. The admiral was looking grave and a trifle embarrassed, as though he wished he had not stumbled upon this purely family affair which had to be settled between aunt and niece.

Diana hated herself for feeling guilty. She only hoped she didn't show it. At heart, she was really resentful towards Marjorie's lack of interest or consideration for the perils she had passed through.

Apparently her aunt was concerned, not with her safety, but with the preservation of the proprieties during her absence.

"Oh how I wish Steve were here!" Diana breathed to herself as she meekly followed Marjorie and the admiral into the supper room.

(Copyright, 1922, for The Constitution.)

Another fine installment of this story tomorrow.

Midweek Dance At East Lake Club.

The East Lake Country club was the scene of many enjoyable parties at the regular midweek dinner dance Wednesday evening.

C. H. McMillen entertained for Miss Louise Welford of San Antonio, Texas, and Mr. and Mrs. Lawrence DeCane of Boston. Covers were laid for Miss Louise Welford, Miss Lillian Carter, Miss Grace Morrison, Mr. and Mrs. Lawrence Deane, R. Blanchard, Mrs. June Courtney, Mrs. Lillian Walters, A. M. B. Malone, C. H. McMillen.

Mr. and Mrs. C. L. Barnwell's guests were Mr. and Mrs. James N. Brawner, Mr. and Mrs. Frank Vaughan and Frank Vaughan Jr.

Mr. and Mrs. Joseph S. Cook entertained Miss Hudgins, Mr. and Mrs. Alfred Barili, Mr. and Mrs. K. R. Perry, Preston S. Stevens, F. Graham Williams.

Mr. and Mrs. L. W. Crews of Spartanburg, S. C. were guests of Mr. and Mrs. Morgan Wynne.

William Tate Holland entertained Miss Eleanor Odum and B. H. Folds of New York.

Among those dining were Mr. and Mrs. M. S. Mentzer, Dick Mentzer, Dodge Mentzer, Mr. and Mrs. James J. Nicholson.

Those dancing were Misses Georgia Dickinson, Estelle Lindsey, Mildred Winston, Elizabeth Carroll, Margaret McArthur, Miss Freeman, Lillian Golden of New York, Aline Bagby, Abbie Englehart, Grace Stephens, Mary Bardwell, Nellie Melver, Dorothy Lee of Atlanta, Joyce White, Helen Johnson, Dorothy Bryant, Mary Mauritz, Jeanette Harwell of Memphis, Nell Harwell of Louisville, Mary Smith, Mary Wood, Venice Mayson, Edna Horne, Mr. and Mrs. Guy Shearer, Mrs. H. B. Worsley, Dr. and Mrs. Carlton Lee, Arch Cunn, C. J. Williamson, Wm. and Cora White, M. B. Bloodworth, Bernard Neal, Charles W. Wynne, Tom Wilson, J. R. Hodges, E. A. Emmerman, Jr., R. Stephens, Ben Ragsdale, Imman Knox, Paul Jones, J. J. Simpson, J. F. Stevens, Sam McDaniel, William Minnich, Edgar Chambers, H. G. Kuhrt, W. Phillips Jr., Fred McClinton, Edmond Zachery, William Noyes, William O. Baldwin, W. E. McIntosh, Dr. Paul Hudson.

Beautiful Breakfast At Norcross Home.

Mrs. J. E. McElroy, of Norcross, entertained at morning coffee Friday, at her home, "The Oaks," the honor guest being her daughter, Mrs. Lester Hogsd, of Toccoa, who, on Mr. and Mrs. Hogsd's return from Chicago and other points of interest, stopped over with her parents for several days.

Breakfast was served in the dining room, which was effectively decorated with gaily colored summer flowers. The table had a handsome linen and silk knitted cover, with a Japanese bowl filled with bright blossoms.

Those invited were Mrs. H. H. Miller, Mrs. Jones Yow, Mrs. James Blalock of Elkhorn, Ky.; Mrs. Thomas McKinnon, Mrs. Henry Strickland, of Duluth; Mrs. William Kilgus, Mrs. E. C. Buehler, of Ocala, Fla.; Mrs. Arch Leitch, Mrs. Pat Sumner and Mrs. Vern Nesbit.

Mrs. Walker, Hostess At Bridge-Luncheon.

Miss Freda Jackson, who is the guest of Miss Frances Powell was honored at a delightful bridge-luncheon given by Mrs. George Walker at her home in the Georgian Terrace.

The well appointed luncheon table, overlaid with lace, held in the center a silver vase of roses and gladioli.

The guests included a few close friends of Miss Powell and her guest.

## THE HOME IN GOOD TASTE

By Harold Donaldson Eberlein  
Joint Author of "Practical Book of Interior Decoration," Etc.

No. 29—Rag Carpets and Rugs.

Rag carpets and rag rugs are not things to be despised. One can get admirable results in a simple way by using them. They are especially suitable for bedrooms, and particularly those bedrooms are furnished with cottage furniture or with the unpretentious furniture of a truly Colonial type.

Rag rugs and carpets are inexpensive and possess the merit of being light and easily manageable when cleaning is to be done. The old rag carpets of not many years ago were of no particular ground color and were adorned with garish stripes of red, green and yellow. All that is now changed and one can find rag carpets and rag rugs of convenient sizes, in almost any color or blend of colors likely to be required. As a rule, the ground color is of a neutral tone, so that there is no difficulty in harmonizing it with the other furnishings.

One important thing, however, should be kept in mind. In a room with rag carpets or rag rugs, the window hangings and upholstery should be of the simplest materials—linens, ginghams and inexpensive cretonnes. It would be foolish and out of keeping to use richer or heavier materials along with woven-rag floor coverings.

Tomorrow—"The Use of Mattings." Copyright, 1922, for The Constitution.)

Miss Campbell, Hostess At Bridge-Tea.

Miss Lula Graves Campbell was hostess at an attractive bridge-tea Thursday afternoon at her home in Fairview road, in compliment to Mrs. Joseph Byron Morrison, of Minneapolis, who is visiting her mother, Mrs. Florence B. Eckford.

The prizes were dainty French novelties.

The guests included Mrs. Martin, Mrs. George Woodruff, Mrs. Clem Evans, Mrs. Lynn Howard, Misses Maude Carleton, Carolyn Lye, Martha Magill, Hattie Poole, Dorothy Haverty, Lucy Candler, Elizabeth Owens.

Musicians' Club To Give Dance.

A delightful affair of Sunday evening will be the regular week-end dance of the Musicians' club for its members and friends, which will be held at Roeland, Peachtree street at Cain, beginning at 9 o'clock.

Of special interest to the members will be the appearance of Miss Florence Britcher in a spectacular "Fire and Serpentine Dance," with a gorgeous costume and specially designed lighting effects. Music will be rendered by the Atlanta Domino orchestra. Former visitors cordially invited.

Mrs. Hargrove to Entertain at Bridge.

Mrs. J. Lewis Hargrove will entertain with a bridge-tea, Friday afternoon, in compliment to Miss Dorothy Pittman, of Jacksonville, Fla., and Miss Gladys Crawford, of Tallahassee, Fla., who are the guests of Mrs. W. E. Carson.

The guests will include Misses Esther Cherry, Rosella Bricker, Lillian Barr, Margaret Zateau, Janie Near, Mrs. Minor S. Franks, Mrs. W. B. Savage, Mrs. A. A. Barr, Mrs. W. E. Carson and Mrs. Ella Chisholm.

We could make a cheaper loaf of bread by using cheaper ingredients, but it wouldn't be—

## BEAUTY CHATS

### LOOKING YOURSELF OVER.

It is necessary from time to time to repeat advice that I am sure my old readers are tired of hearing; that is the advice to look yourself over thoroughly from time to time, critically, so that you will not fall into careless ways. Have as many mirrors in your room as you wish, or as you can afford. Mirrors make a room seem larger and make it brighter by reflecting the light. They should be fixed, if possible, to show you yourself from different angles.

You should have a mirror to show you how you look in back. It need not be a full length mirror, which is much more expensive. It need only be half the length of your figure, but if it is placed high enough from the floor so you can see your eyes in it, you will also be able to see your whole figure to your feet. If possible, it should be hung so it reflects the mirror of your dressing table. In this way you are constantly seeing yourself from all sides as you dress and with-

out any extra time or trouble you will fix your hair and your frock so it looks as well from the back as from the front.

This matter of how you look in back is an extremely important one. A woman whose waist and skirt show a white gap between them presents a ridiculous appearance. The woman whose collar is constantly untidy where it fastens behind will certainly never be considered good looking or well dressed. The best figure in the world will lose its grace if it wears a skirt that either sags or hikes in the back.

The matter of hair dressing is still more important. Most women who have any sense about dressing at all will do their hair becomingly about the face, but few dress it well in back.

Anna: A blackhead powder is made by mixing together one ounce of powdered borax, one ounce of almond meal and two ounces of cornstarch. This is used in the place of soap.

Myra: There can be no merit in the things you have been using upon your

hair if it has been growing more lifeless all the time. A fine toothed comb is irritating to the scalp and should only be used when needed. Dandruff is best removed by shampooing after all the scales have been softened by means of a massage with hot crude oil. The easiest way to restore your hair to a healthy condition is to build up the scalp and this can be done by increasing the circulation in it through a daily and vigorous massage, or by treating it with the vibrator. A good tonic will also help. Tomorrow—Summertime Foods.

For a cooling let-down after the driving heat of the day, try an iced glass of Tetley's Orange Pekoe Tea. A whiff of its flower-like fragrance and a sip of its amber deliciousness will put hot-weather discontent to rout.

## BEAUTY CHATS

### LOOKING YOURSELF OVER.

It is necessary from time to time to repeat advice that I am sure my old readers are tired of hearing; that is the advice to look yourself over thoroughly from time to time, critically, so that you will not fall into careless ways. Have as many mirrors in your room as you wish, or as you can afford. Mirrors make a room seem larger and make it brighter by reflecting the light. They should be fixed, if possible, to show you yourself from different angles.

You should have a mirror to show you how you look in back. It need not be a full length mirror, which is much more expensive. It need only be half the length of your figure, but if it is placed high enough from the floor so you can see your eyes in it, you will also be able to see your whole figure to your feet. If possible, it should be hung so it reflects the mirror of your dressing table. In this way you are constantly seeing yourself from all sides as you dress and with-

out any extra time or trouble you will fix your hair and your frock so it looks as well from the back as from the front.

This matter of how you look in back is an extremely important one. A woman whose waist and skirt show a white gap between them presents a ridiculous appearance. The woman whose collar is constantly untidy where it fastens behind will certainly never be considered good looking or well dressed. The best figure in the world will lose its grace if it wears a skirt that either sags or hikes in the back.

The matter of hair dressing is still more important. Most women who have any sense about dressing at all will do their hair becomingly about the face, but few dress it well in back.

Anna: A blackhead powder is made by mixing together one ounce of powdered borax, one ounce of almond meal and two ounces of cornstarch. This is used in the place of soap.

Myra: There can be no merit in the things you have been using upon your

hair if it has been growing more lifeless all the time. A fine toothed comb is irritating to the scalp and should only be used when needed. Dandruff is best removed by shampooing after all the scales have been softened by means of a massage with hot crude oil. The easiest way to restore your hair to a healthy condition is to build up the scalp and this can be done by increasing the circulation in it through a daily and vigorous massage, or by treating it with the vibrator. A good tonic will also help. Tomorrow—Summertime Foods.

For a cooling let-down after the driving heat of the day, try an iced glass of Tetley's Orange Pekoe Tea. A whiff of its flower-like fragrance and a sip of its amber deliciousness will put hot-weather discontent to rout.

# FINALS START IN NATIONAL OPEN THIS MORNING

## Twenty-Four Golfers Enter Select Circle On Final Day McDonald Leads With 143

Howard Beckett, of Atlanta, Fails to Qualify.  
Bobby Jones Practices Putting.  
Many Others Just Rest.

Glencoe, Ill., July 13.—(By the Associated Press.)—Eddie Towns, of Shannopin, Pa., in making his 71 in the morning round became the first player in the national open tournament to join the "hole in one" club. On the 180 yard thirteenth hole, Towns put his tee shot directly into the cup on the fly and the pin held it there. He used a midiron.

BY ALEXANDER F. JONES.

Skokie Country Club, Glencoe, Ill., July 13.—Parade and side-shows are over, and the guests in the red wagon are now ready to take tickets for the big show in the national open golf championship tournament here.

The final qualifying round was run off Thursday with the well-known neatness and dispatch, with few spectacular features, but much anxiety by both the star performers and the galleries for the real competition to start.

When the last of the weary qualifiers struggled to the home green Thursday night, everything was all set for the real fireworks.

The course, presenting a startling change in appearance from the flood-bound marsh of Tuesday, was velvet carpet. So quickly did it drain and steam out under the blazing sun of Thursday that the fairways were actually so dry that low drivers were getting good distance after the carry and the greens were wonderful.

All day long the real stars, not qualifiers, put in long hours practicing putting. Bobby Jones is going to determine how far he gets in this tournament.

"Long Jim" Barnes, the present open champion, was a regular hand around the hole. He acted like Dempsey before a fight. His rooster claimed this meant Barnes was "right." Chick Evans played around on another course. Bobby Jones is going to determine how far he gets in this tournament.

While the actors in the crucial competition were boarding needed strength, thousands of golf fans were pouring into Glencoe, and Chicago.

Bob McDonald, the Bob o' Link professional, and holder of the Metropolitan open championship, was the headliner of the final day's qualifying, scoring a 143 after 36 holes of brilliant golf with Pat O'Hara, the Richmond Hills, Staten Island, pro.

Bob in the hole of the fourth of the towers over most of the others physically and a golf club in his huge hands looks as fragile as a toothpick. Scoring a 72 in the morning round, he came home with a 71 in the last round, giving him a score just three over par for the 36 holes. Pat O'Hara, his partner, played almost as brilliantly, getting a 147. Pat made up in his putting what Bob gained in driving during the earlier play. He sank putts all the way from the edge of the green to the rim of the cup with equal sangfroid. Corking golf by a number of pros featured the day generally. Bill Heilman, of Dayton, came in with 145; Ned McKenna, Rochester, N. Y., 76-71-147.

Howard Beckett, of Atlanta, failed to qualify, his putting being erratic.

OUR OLD FRIEND Tyrus Raymond Cobb, of Augusta and Detroit, home of flippers and hard hitters in the baseball world, has caused the proprietariat to rise up and cheer on account of the Georgia Peach's grand rally that has brought him to the position of runner-up in the batting race in the junior major. An unofficial batting average of .533, not counting yesterday's game, is one that is not to be sneezed at. George Sisler is going to have to slip on his batting shoes on Ty will pass him shortly.

DURST's wild toss into the Browns' dugout at the Polo grounds is one of the prize peaves of this season. Larson Ward tossed one that resembled this a few weeks ago—but there was no riot. When Empire Ollie Chill, whom we well remember from Central league days, yanked one on Wednesday night, he twiddled something about \$1,000 and forfeited the game it went out and away.

THE INFERENCE on the part of some about that guarantee that was paid to Johnny Ruff after his Lynch spanking by a few nights ago in the New York velodrome sounds like piffle. Although it may not be strictly ethical there is hardly a fighter of any prominence that has not done exactly what Lynch did in this battle—gambled on the size of the prize with his opponent. Lynch figured that he would draw lots more than he did. He thought that with his chance of winning back the prize there was also a slight chance of his adding a few sticks and feathers to the old nest. He guessed wrong—and it cost him about \$10,000. Who qualified? That should be the

important question for sportsmen to consider.

THAT JESS WILLARD-Jack Dempsey bout that they are cooking up at present looks to be a whole lot more of a battle than the one that has been practically arranged between Dempsey and Willis. After all it is said and done—who has Willis whipped? That is, what real top-notchers. He has been hipodroming with a lot of hasbeens up around New York, but for the life of me I can't see where there is one earthly chance that he has of whipping Dempsey. This may be the reason for the bout—Willard not having a chance, and Jack's bankroll rubber slipped a few times too often and the old wallet looks as if it had been trampled in a stampede of elephants.

A couple of hundred grand would put new life in this very necessary adjunct to the champion's popularity—and where there's a will there's a way. (Wow, that's rotten.)

AFTER HEARING several French soldiers ideas of getting "somebody told" we shudder to think under what a handicap Legien must labor in verbal duels with an opponent.

MOTION IS MADE, seconded and carried by an overwhelming vote that references to dry nineteenth holes in golf tournament be deleted by the censor. Permission is hereby given, and all readers are hereby appointed censors in this emergency.

ONE THING THAT Atlanta fans can be thankful for after the showing of the Crackers in a baseball way is—Chattanooga can't beat any one in the league except this bunch of pulverized Crackers, and thank goodness they don't meet Atlanta every day.

NEW YORK, July 13.—Declared a criminal by the attorney for the anti-prize fight forces of New Jersey, Tex Rickard, the famous promoter, sprang from his chair at a hearing in the offices of the New Jersey boxing commission Thursday afternoon and made for the man who was speaking for the reformers.

The result of the hearing was that Rickard received the new promoter's license for which he had applied and also a permit to hold the Leonard-Leonard fight, the first weight championship battle in the Rickard arena on Boyle's thirty acres, Jersey City, July 27.

"This man," admitted that he ran a gambling house in the west, that he promoted prize-fights, that he violated the Crims act, having been convicted of crime," said Rickard, the famous promoter, sprang from his chair at a hearing in the offices of the New Jersey boxing commission Thursday afternoon and made for the man who was speaking for the reformers.

# B. V. D. TRADE-MARK PROTECTED IN COURT

Action against two Atlanta clothing firms to prevent infringement upon the trademark "B. V. D." in sale of men's underwear was taken Thursday when the B. V. D. company, of Delaware, filed petitions for injunction against the Vogue Shop, 80 Peachtree street, and the Broadway Shop, 30 North Broad street, seeking to prevent them from selling other brands of men's underwear as "B. V. D." Judge Samuel L. Sibley set September 2 for hearing the petitions.

These actions mark the newest phase of an extensive campaign by the B. V. D. company for the protection of its trademark, according to Frank I. Schechter, New York, general counsel for the company. Mr. Schechter arrived in Atlanta Thursday. He stated that a number of similar actions against other firms were in the course of preparation. The Atlanta firm of Canfield, Thompson & Hirsch has been retained to co-operate in handling the local cases. "The name 'B. V. D.' is a valuable piece of property which we are seeking to protect with the aid of the courts," Mr. Schechter stated. "It is a registered trademark and applies only to the brand of underwear manufactured by the B. V. D. company."

CALL BELL ISLE TAXICABS

# SENATORS DELAY SHOALS ACTION

Washington, July 13.—After a stormy session, the senate agricultural committee decided tonight to postpone action on the Ford and other offers for development of the government's properties at Muscle Shoals, Ala., until next Saturday.

At that time the committee agreed to vote without further debate on the question of reporting one of the proposals to the senate for final consideration.

It was understood that of the offers before the committee either that proposed by Henry Ford, or by Senator Norris, of Nebraska, committee chairman, would be reported out. The committee's consideration tonight centered principally on those two offers, a wide division being apparent with the committee.

Thirteen of the sixteen committee members attended the session. Unofficial reports following the committee meeting represented the committee as being five against favorable report of the Ford offer and eight in favor. Representatives of Henry Ford, the Alabama Power company and of Frederick E. Engstrom were called before the committee's executive meeting and remained closed with the committee for about an hour.

# STRICKLANDS FREED OF ROBBERY CHARGES

Judge Luther Z. Rosser, Jr., in the municipal court Thursday dismissed warrants charging robbery to Mr. and Mrs. J. W. Strickland, 85 West Pine street, sworn out Wednesday at the instance of J. A. Sellers, who is in the Fulton tower charged with the murder of W. E. Strickland, at the Hunter street address on the night of July 4.

The Stricklands were arrested on their return from Shelby, Ala., where they went to attend the funeral of W. E. Strickland. Sellers' son, Lee Sellers, took out the warrants.

The elder Sellers contends the Stricklands invited him to their apartment to take a drink of whiskey, and that on reaching the place, they sold him a pint of liquor for \$1.50, which he claims he paid. After several drinks were taken, Sellers claims that Strickland accused him of not paying for the pint and that a general fight started.

Continued from first page.

# DUPRE TO CONTINUE FIGHT FOR LIFE

Continued from first page.

law by the courts lies the only protection to society. We confidently assert that no decision of this court can be cited where the judgment of the trial court was reversed on a charge containing language subject to so little criticism.

In a review of the evidence in the Dupre trial, the opinion stated:

Letter Sent Constitution.

"A case is rarely encountered where there is so nearly no defense. The accused callously and of his own volition details a series of crimes, including thefts from his own kinsmen, who hospitably received him as a guest for the night. After the homicide, and before his arrest, he wrote a letter to The Atlanta Constitution for publication, in which the complaints of the interception of his telegram and the loss of money occasioned thereby.

"With insolent bravado he repeats the statement of the chief of the Atlanta detectives that he was hiding and says: 'I am not in hiding and do not intend to be.'

"Except he says he was 'sorry' I had to shoot Mr. West, but I think he will mind his own business next time, nowhere does he express regret or shame for the series of crimes which finally culminated in the murder of Walker. He was even pleased to style himself the 'Peachtree bandit.'

In commenting on the self-defense claim of Dupre, the opinion read:

"Dupre said he believed Walker would have shot him if he had not shot first.

"Any person who saw the act (robbery) had a right to arrest Dupre and to use what force was necessary in so doing."

# FURHER CROP LEAD TO GAIN IN COTTON PRICES

## Reactions in Late Day Trading Easily Halted; Close 30 to 40 Higher

New York July 13.—Reports of crop deterioration in the southwest and boll weevil complaints from nearly all sections, led to a continuation of yesterday's buying movement in the cotton market and caused a further sharp advance today. October contracts sold up to 22.84 or 53 points net higher and over a cent above the low level of last Monday. There were reactions later, but offerings were absorbed on moderate setbacks with October closing at 22.71, and with the general list closing steady at a net advance of 30 to 40 points.

The market opened irregular, September being 2 points higher while other months were 2 to 6 points lower under realizing pressure, but Liverpool soon firmed up, however, with private cables reporting a demand to fix prices on call cotton and the market here showed increasing activity and strength late in the morning on the unfavorable character of the crop news and the more optimistic feeling over German finances.

Wall Street and uptown interests were believed to be active buyers on the advance which carried December contracts up to 22.67 and January to 22.30 or 38 to 53 points net higher on the active months.

The demand tapered off and there was enough realizing to cause reductions of 15 to 20 points but the close was within 5 to 13 points of the best. There were reports that higher temperatures and hot winds were building the Texas crop and that boll weevil damage was increasing quite generally in the cotton belt.

A private mid-month report making the condition 71.6 against end-June figures of 70.5 was without any apparent effect. Port receipts today were 9,125 bales. United States port stocks, 609,810, exports 12,137, making 5,885,260 so far this season. Considerable southern selling was reported on the early advance but the late reactions were attributed chiefly to realizing after the advance of 98 to about 108 points from the low level of Monday.

New York, July 13.—New York cotton. Middling, 22.85.

### SHORTS COVER IN NEW ORLEANS

New Orleans, July 13.—Covering of the short interest furnished the cotton market with a demand today that put prices strongly higher, the trading months before the noon hour being 43 to 46 points up, with October at 22.25. It is the later trading there were small gains, but the tone held very steady and on the close the list was 28 to 45 points net higher on the day, with October at 22.20. It was an active session and during the middle part trading was very heavy. On the opening the market was affected in a small way by the report of Liverpool, but after declines of 4 to 7 points a rapid rise ensued which carried prices to net advances of about a quarter of a cent. Much of this buying was due to further reports from the western belt of hot and dry weather and consequent shedding by the plant. Values were helped to some extent by a private bureau report on condition of 71.6 per cent of normal, indicating a gain of but seven-tenths of a point during the last fortnight. Spot covering became general and during the course of this movement prices rose to their highest.

In the late trading it was plain that bullish enthusiasm was dampened somewhat by a considerable number of telegrams to brokers here from various parts of the belt claiming that damage by high temperatures and drought was by no means general. At the same time the market gained to selling power.

New Orleans Spot. New Orleans, July 13.—Spot cotton steady and unchanged. Sales on the spot 960, to arrive 200. Low middling, 20.50; middling, 22; good middling, 23.50; low middling, 22.50; good middling, 23.50; low middling, 22.50; good middling, 23.50. Receipts 1,172, stock 119,695.

## FORCE OF LAW URGED IN HERRIN MASSACRE

Atlantic City, N. J., July 13.—Justice must be done in the cases of those responsible for the recent massacre of coal miners at Herrin, Ill., "regardless of affiliations," if the United States is to continue as a nation, Assistant Secretary Roosevelt, of the navy department, declared today in an address to the Elks' national convention. "A blot" such as that at Herrin, he asserted, "can be wiped out in only one way—by process of law."

"We are in the midst of troublesome times," Mr. Roosevelt said. "And there are more ahead. There are happenings day after day which illustrate exactly what I mean."

"There are doctrines abroad in the

land which, if not controverted and overcome, may lead to the fall of this great country as countries of the past have fallen.

"But a few short weeks ago, in southern Illinois, as atrocious a massacre occurred as is contained in our annals. Men were killed, not cleanly killed, but brutally killed and up to the time in which I speak, there is no shadow of a conviction of the murderers in sight. I know not who was to blame, whether employer or employee—perhaps both—but, if our country is to stand, we must mete out justice in this case, regardless of the affiliations. Before the law, a man with a million and the man with a dollar stand the same. The offender of great wealth must be brought to task for his iniquities, and the offender of small wealth must be brought to task also."

See Increasingly Lawless.

"Destroy law and the country reverts to barbarism over night. Destroy law and we will be back, in the days of slavery, rapine and pillage."

When the strong oppress the weak when interest triumphs over honor. Our government is arranged in such fashion that it provides a method whereby we who compose it can damage it. Our laws can be changed in like manner. There is, therefore, no excuse for breaking laws. Nevertheless, we seem to be increasingly lawless; we seem bent on destroying the structure we have builded.

"Illinois is but an instance, though a ghastly one, of our reckless disregard of our own laws, made by ourselves. If we love our country; if we believe in civilization, it is our solemn duty now, as never before, to throw our weight behind the law and the law enforcing bodies."

"Grave as this tendency toward law breaking is, it is but one of the dangerous tendencies of the present. There is a doctrine abroad in the land which is just as destructive. This doctrine is that our function in life is to get by with as little work as possible. . . . Where would we be now if our ancestors had failed to work over and beyond a time sufficient to give them the bare necessities of life? We would be living in huts and hovels, and prancing about dressed in animal skins."

U. S. Must Reorganize. "In order to meet this situation we must reorganize, in many respects, our theory of business. We must endeavor to adjust it to the needs of this problem. We must work toward the condition of affairs whereby we may correctly allude to 'those engaged in industry' rather than to 'employer and employee.' We must endeavor to create conditions where in the self-evident interest of all is the success of the business in which they are engaged. We must work out, wherever possible, some type of partnership relationship. This may be by profit-sharing, or some form of group work or something of like nature."

Alma Plans Sale.

Waycross, Ga., July 13.—(Special.) According to information received here yesterday, Alma is preparing to have a big poultry and egg sale, July 20. It is expected that a carload shipment will be made. This is the first of a series of sales planned by the Bacon county farm agent.

Hog Sale Is Success.

Lyons, Ga., July 13.—(Special.)—Toombs county plans to hold two big hog sales in September. The first will be in the new pens at Lyons, September 19, and will have three cars or more of hogs. The next will be at Vidalia, September 28, and will have about the same number. Many farmers are fattening hogs now for these two sales.

## FRANCE WILL INSIST ON GERMAN PROBE

Paris, July 13.—(By the Associated Press.)—France will insist upon a full investigation into the causes which precipitated the present crisis in Germany, leading to the moratorium in cash payments for two and a half years, before any respite is granted by the reparations commission.

This stand on the part of France, it was indicated in official circles today, also applies to the payment due July 15, which France holds should be made, and unless President DuBois, French representative on the commission, is placed in a minority, the 32,000,000 gold marks will have to be forthcoming.

Also under these conditions, it will be some time before action is taken on the moratorium of two and a half years. The committee on guarantees which has been investigating conditions in Germany, has been asked to hurry its report as much as possible, as it is probable that several days will elapse before the report is in readiness for presentation.

Premier Poincare and President DuBois, who are in constant communication, had a long conference this morning. It is understood in official circles that the premier impressed upon Mr. DuBois the importance of the question now before the commission, that it was not merely one of granting a moratorium.

Police Search Town

For Souvenir Shells

Following Explosion

Waterloo, N. Y., July 13.—Police are searching this city for artillery shells retained as souvenirs of the world war, after the explosion of a three-inch shell resulting in the death of eight children. The shell, believed to be a "dud" picked up during the war time target practice of the 104th field artillery in the Pine Plains range, near here, was used as a screen door check on the rear porch of the Edward G. Workman house. In the intense heat, the TNT charge exploded, according to Madison Barracks military officials, making the shell liable to explosion at reduced concussion.

## Salesmen and Solicitors

WANTED—At once several

good solicitors. Must give city

references; men of ability and

not afraid of work can make

good money. We have had sev-

eral to make from \$25.00 to

\$60.00 per week. Apply to A. C.

Tommy, City Circulation De-

partment, Second Floor, Constitu-

tion Bldg., Alabama and Forsyth

Streets.

I WANT the four best house-to-house

callers in Atlanta to help me introduce

my new product. I will pay \$10.00

per week for each man who can

secure 100 new orders. No salary

advance. For personal interview call

Main 1072. Address: 1072 Main St.

WANTED—Several real estate sales-

men for high-class proposition; unless

a producer and willing to work

hard for real money don't waste your

time. For personal interview call

Main 1072. Address: 1072 Main St.
